

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. THE AMERICAN ALMANAC & TREASURY OF FACTS,

STATISTICAL, FINANCIAL AND POLITICAL,

Edited by AINSWORTH R. SPOFFORD, Librarian of Congress,

Contains this year more than its usual variety of official and statistical information. This work, now in its fifth year of publication, gives, in the most compact form for ready reference, all the most important facts concerning American Agriculture, Manufactures, Mining, Shipping, Railroads, Telegraphs, Banks, Post Offices, Public Lands, Pensions, Patents, Education, Currency, Revenue and Expenditure, Taxation, Prices, Tariffs, Imports and Exports, Public Debts, Investments, Army and Navy, etc. The book contains an Official Directory of Congress and the Executive and Judicial Officers of the Government, with full Tables of the Administrations and Presidential Elections, from the beginning. To these is added a view of each State in the Union, with a list of State Officers, Finances, etc., and a succinct view of Foreign nations, with notable events and obituaries of the year.

THE UNITED STATES CENSUS of 1890, so far as officially tabulated, is also embraced. The book contains the essence of hundreds of volumes of public documents and other books. Also, the full vote of every county in the United States at the Presidential and Congressional elections.

ECLIPSES FOR THE YEAR 1882.

In 1882, there will be two Eclipses, both of the Sun, and a transit of the planet Venus over the disk of the Sun.

1. A total Eclipse of the Sun, May 17. Visible in Europe, Asia, and in Northern and Central Africa.

2. An annular Eclipse of the Sun, November 10, invisible in North and South America. Visible in Australia, Polynesia, and the Southern regions of the Pacific ocean.

A transit of Venus over the Sun's disc will occur on December 6. Visible in a greater or lesser degree to a large part of the world, except to Eastern Europe and to Asia; and wholly visible to the Eastern portion of North America and to South America. Invisible to most of the United States lying west of 110° W. longitude from Greenwich. There will be four contacts of the circular disk of the Sun and the planet.

EXAMPLE 1.—To find the day of the week for July 4th, 1881. Opposite Century 19, New Style, and over year 81, is *Saturday*. Under July, Saturday falls in the vertical line under 2, and the second day to the right following, under 4, is Monday, July 4th.

EXAMPLE 2.—To find the day of the week on which Columbus discovered America, October 12th, 1492, Old Style. Opposite Century 15, Old Style, and over 92 in black letter (it being leap year,) is *Monday*. Therefore, October 8th was Monday; and the line of week-days in which Monday falls under October (which is the sixth,) with the days of the month above, constitute the entire Calendar for October, 1492, Old Style, and the 12th, as seen, falls on Friday.

EXAMPLE 3.—To find the 1st Tuesday after the 1st Monday in November, (Election Day,) 1882. Find 82 in "Years of the Century;" follow up the column to the day on a line with the figure 19 of the "Centuries, New Style;" this will be found to be Sunday. Under November, Sunday is found in the vertical line under 5, of the calendar above, Monday to the right of it under 6, and Tuesday under 7. So the Tuesday after the first Monday, is the 7th.

THE TIME OF HIGH WATER

at the places following may be found approximately for each day by adding to or subtracting from the time of high water at New York the hours and minutes annexed.

EXAMPLE.—To ascertain at what hour it will be high tide at Baltimore on the 1st of August, find the time of high water at New York under August 1st, which is 4.24 A.M., then add 10 hours 52 minutes, as found in the table of Tide Constants under Baltimore, and we have 3.16 P.M. as the hour of high water at Baltimore August 1st, 1880.

NOTE.—The hours of high water in the calendar pages are the morning hours—from midnight to noon—throughout the year, as computed for the U. S. Coast Survey. To find the time of next high water, or the afternoon tide—from noon to midnight—add 12 h. 25 m. in each day. The result will be the proximate hour of evening tide. For low water, add 6 h. 13 m., approximately, to the time of high water.

Explanation of the Calendar.

THE two natural divisions of time are the day, of 24 hours, representing one revolution of the earth on its axis, and the year, 365 days, approximately representing one revolution of the earth around the sun. The month represents (nearly) the period of the moon's revolution round the earth (about 29 $\frac{1}{4}$ days), while the week is approximately one-fourth of this.

By the Julian Calendar, established by Julius Cæsar, 46 B.C., the months were reconstructed; the Roman year, which began March 1, and had but ten months, being changed to Jan. 1, and two months added. Thirty-one days were given to the 1st, 3d, 5th, 7th, 8th, 10th, and 12th months, and 30 days each to the rest, except February, which on every fourth year received an intercalary day, made by the *sexta Calendas Martius*, whence "leap year" came to be called *Bissextile*. As the Julian year had 365 $\frac{1}{4}$ days, its length exceeded the true solar year by 11m. 14 sec., so that the equinox in the course of centuries fell back several days. To correct this error, Pope Gregory XIII. in 1582 reformed the calendar by suppressing ten days, restoring the equinox to March 21. The Gregorian Calendar also made every year which is divisible by four without a remainder a leap year, except the centesimal years, which are only leap years when the first two figures are divisible by four: thus 1600 was a leap year, 1700, 1800, and 1900 common years, 2000 a leap year, etc. The length of the mean year is 365 d. 5h. 49m. 12sec., exceeding the true solar year nearly 26 sec., which error amounts only to 1 day in 8,325 years.

The Gregorian Calendar was adopted by Germany in 1700, and by English law in 1752, when the Julian Calendar, or *old style*, gave place to the *new style*, by dropping eleven days from the month of September, 1752.

The festival of Easter, commemorating the resurrection of Christ, used to be observed on the 14th day of the moon, i.e., near the full moon—the same as the Jewish Passover. But the Council of Nice, A.D. 325, ordered Easter to be celebrated on the Sunday next succeeding the full moon, that comes on or next after the vernal equinox—March 21st; thus making Easter and the related feast and fast days movable holidays.

JANUARY is so named from the Roman *Janus*, who was the porter of heaven, having the surname of *Patulcus*, the opener. He presided over the beginning or opening of everything, hence the first month of the year was called after him, when the Roman year was altered by Numa Pompilius (in the 7th century B. C.) from ten months beginning in March, to twelve months by adding January and February. In his original character Janus was the god of the sun, and worshipped as such by the Etruscans and the Romans. The temple of Janus, (which was really a covered passage or gate at Rome) was left open in war as a symbol that the god had gone out to assist the Roman arms, while it was continually shut in time of peace.

On New Year's day, which was the festival of the god Janus, the Romans gave presents to one another. Thus ancient was the origin of the modern custom of New Year's presents and first of January festivities.

FEBRUARY, according to some, derives its name from the Latin *februare*, signifying to explate or purify, as the Romans had a custom of general lustrations and purifications in the latter part of that month. More generally, February is traced to the Roman divinity, *Februus*, afterward identified with the god Pluto, of the lower world. Still another origin is found in the goddess *Februa*, supposed to be the same as Juno; and Dr. Foster says: "The evident relation between the *Februata* Juno and the *Purificata* Virg. Maria is one of the most striking instances of the connection between pagan and Christian rites and festivities as to the period of their occurrence."

The festival of the dead (*Feralia*) was celebrated by the Romans in the month of February.

The month of MARCH was named from Mars, (Lat. *Martius*), the Roman god of war. This divinity was known as Father Mars, and next to Jupiter, he enjoyed the highest honors at Rome, of which city Jupiter, Mars and Quirinus were the three tutelary divinities. March was the first month in the early Roman calendar, and the legal year began with March 25 even in England, until the change from Old Style to New Style in 1752. (See Explanation of the calendar, p. 5.) The custom of reckoning the year according to the old style is still retained in Russia, and even the financial year of Great Britain is reckoned from the 31st of March. In historical works, dates are frequently written thus, Feb. 11, 1732, the upper figures representing old style reckoning, and the lower, new style.

We also see dates between Jan. 1 and March 25 expressed thus, Jan. 30, 164 $\frac{1}{2}$, meaning that the year was legally 1648, (O. S.) but by modern reckoning, 1649, (N. S.)

APRIL (Lat. *Aprilis*) derived probably from *Aperire*, to open, because spring and the buds generally open in this month. Another derivation has been found in the dedication of this month by the Romans to Venus, goddess of buds and beauty, whose name in Greek was *Aphrodite*, whence *Aphriliis* or *Aprilis*. This is more fanciful than the first-named derivation, but the word-mongers are never daunted by difficulty, any more than by distance, in their etymologies.

In the French revolutionary calendar, April included most of their new season of *Germinal*, and the beginning of *Floreal*.

On the ancient monuments, *Aprilis* appears as a dancing youth with a rattle in his hand, thus symbolizing the gay and jocund spirit of spring.

All Fool's Day (April 1) is traced through every country of Europe to the Hindoos, and even farther back, to the mistake of Noah in sending the dove out of the ark before the water had abated, on the Hebrew first day of the month.

MAY (Lat. *Maius*) was consecrated to Apollo among the Romans, and is derived from *Maia*, a feminine divinity worshipped at Rome, to whom sacrifices were offered on the first of May. Some philologists, however, hold that *Maius* is a contraction of *Magius*, derived from the Sanskrit root *mag* or *mah*, to grow.

The custom of observing May-day, or the first of May, with floral and festive ceremonies, is older than the Middle Ages, and is probably the lineal descendant of the Roman *Floralia*, or festival in honor of *Flora*, celebrated from April 28 to May 2.

In England the custom of going out a-Maying is mentioned in Chaucer and Shakespeare. Before sunrise young people went to the groves to gather flowers and branches of foliage to adorn the village May-pole, around which the dancing was kept up. A queen of the May, the most beautiful girl in the village, was elected for crowning.

JUNE, the month of roses, has been commonly traced to Juno, worshipped at Rome as the queen of heaven. The connection is found in the fact that the month of June (said to have been called originally *Junonius*), was considered the most favorable period for marrying; and Juno was the great protector of the feminine sex, and believed especially to preside over marriage. Another origin is found by some in the Latin *Juniores*, the young men, to whom Romulus is said to have assigned it; and still another in *jungo*, to join, (as in marriage.)

The Anglo-Saxons called June "midsummer month."

In the northern United States June is the most delightful month of the year, when the flowers put on their richest bloom, and the birds warble their most musical songs, while the earth, the air, and the water teem with vigorous life, and the hours of the day far outnumber those of the night.

JULY. This month derives its name from *Julius Cæsar*, who was born on the 12th of the month, originally called *Quintilis*, it having been the fifth month in the original Latin year, which began with March. The change of name was proposed by Mark Antony, and easily carried in the days of the great Julius.

This is the month of "Dog-days," usually reckoned as beginning on the 3rd of July and ending about the 11th of August. These days were so called from the star Sirius, or the dog star, in the constellation of *Canis Major*, to which the extreme heat of mid-summer was superstitiously attributed. During these oppressively hot days it was also supposed that dogs are more likely to run mad than at other seasons,

AUGUST, like July, owes its name to the Roman Cæsars, the Emperor *Augustus* having followed in the footsteps of his illustrious predecessor by appropriating a month to him self. Formerly called *Sextilis*, or the sixth month, when Julius Cæsar changed the calendar it still continued *Sextilis* and had thirty days, while February had twenty-nine, and in leap-year thirty days. To gratify the vanity of Augustus, one day was taken by the obsequious Senate from February and added to August, so as to make his month equal in extent and dignity to July.

August is associated, at least in this country, with intense heat and welcome vacations; schools and colleges shut up, the cities pour themselves into the country, and seaside and mountain resorts are thronged.

SEPTEMBER is so called from the Latin *septem*, seven, because it was the seventh month of the Roman year, which began with March, until the change of the calendar under the second King of Rome. Though September became then the ninth month, and October, November and December, the 10th, 11th and 12th, respectively, instead of the 8th, 9th and 10th, the ancient designations are still retained, in spite of their total inaccuracy; an instance of conservatism enduring through ages, and still perpetuated.

September is the month of harvest through large areas of the globe, and in Switzerland it is still called *Herbstmonat*, (harvest month.)

Harvest moon is the full moon nearest the autumnal equinox, (Sept. 21,) so called because it enables farmers to prolong the day's work during the autumnal harvest. In England and northern Europe the harvest moon rises near sunset several evenings successively; but this phenomenon is less marked in the United States because of our lower latitude. The recurrence of what was called an equinoctial storm at or about the time the sun crosses the equator, has ceased to be (if in fact it ever was) a thing to be depended on.

OCTOBER (Lat. *octo*, eight,) was the eighth month of the Roman calendar, before its reformation. This has given rise to the following quatrain:

"October has its name from *octo*, eight;
Though 'tis the truth, perhaps 'tis well to state,
Such sixes and such sevens the months were knocked to,
That ten became translated into *octo*."

The splendor of October in the country, when the air is crisp and full of electric energy, and the green forests change to the gorgeous and many-colored hues of autumn, has been celebrated by many writers.

NOVEMBER (Lat. *novem*, nine,) is now the 11th month, instead of the ninth, as before the change of the Roman calendar.

Though frequently cold and blustering, November is redeemed almost every year, throughout a large region of the United States, by the delightful weather known as Indian summer, when for days or weeks the sun pours its rays mildly through a haze, and the soft and genial air invites us abroad to enjoy, as it were, a second edition of summer before winter closes in.

November is also notable in the northern parts of the United States for its time-honored festival of Thanksgiving, which originated with the Pilgrim fathers at Plymouth. Formerly celebrated on different Thursdays, as fixed by proclamation by the various State governors, Thanksgiving has now come to be generally observed on the last Thursday in November, as announced by Presidential proclamation.

DECEMBER, (Lat. *decem*, ten,) the tenth month of the early Romans, has become the twelfth, rounding out the year.

This is the month of the longest nights and the shortest days, as the winter solstice falls on the 21st of December.

When the French revolutionized the calendar in 1792, and gave the months new and significant names, December was cut in two, the first part of it becoming *Frimaire*, (frosty,) and the last, *Nivose*, (snowy.)

As the month of the Christmas holidays, which continue, where fully celebrated, from Dec. 24 to Jan. 2, or even longer, December's cold and gloom are enlivened with the joyousness, generosity and charity of the greatest festival in the calendar.

THE BALANCE OF TRADE FOR 25 YEARS, 1856-1881.

From the Financial Review, 1877, with Additions.

For the purpose of showing the total amount of exports and imports of merchandise and the total of specie in each year since 1856, the table below has been compiled. In the columns headed "Excess" are given the differences between exports and imports each year, showing at a glance the "trade balance" of the country.

IMMIGRATION INTO THE UNITED STATES, 1820-1881.

PRIOR to the year 1820, no statistics of immigration were officially kept. By the Act of Congress, of March 2nd, 1819, Collectors of Customs were required to keep a record and make a quarterly return to the Treasury, of all passengers arriving in their respective districts from foreign ports; and these reports, published from time to time by the Treasury Department, constitute the sources of information as to the progress of immigration. The total number of foreign-born passengers arriving at the ports of the United States, from 1820 to 1880 inclusive, is given below. Prior to 1856, the figures show the whole number of aliens arriving, but from 1856 to 1880 inclusive, the number of immigrants only, i. e., of foreign passengers settling in the United States.

It has been estimated that the whole number of aliens coming to the United States from 1789 to 1820, was about 250,000.

STATISTICS OF AMERICAN AGRICULTURE.

THE following statistics of the agricultural products of the United States represent the leading crops for a series of years since 1870. For the year 1869 we have the figures of the census of 1870, which are the result of a detailed enumeration taken by the United States marshals and their deputies, as to the amount of land under tillage, and the quantity of each crop produced during the agricultural year 1869. The figures here given for each year since do not represent a census of agriculture, but the estimates made up by the Department of Agriculture from the returns received through its correspondents in all parts of the country. These correspondents estimate the area in specific crops, and from their own experience and judgment form an opinion of the condition of the plant of each crop from month to month, and ultimately of the quantities produced. These returns are recorded, and the records prepared by counties are summed up and averaged at the Agricultural Department, and the averages corrected by a duplicate record, in which the difference in the productive value of the counties is considered. To cite the language of the Report of the Commissioner of Agriculture, "the corrected result stands as an average, not inevitably of the whole State, but of such portion, half or two-thirds, or whatever area is reported of the entire State." While the results cannot possess the authority of an accurate census, they are all that we have since 1870, except in a few States where agricultural statistics are collected by law.

It is believed that the table given above will fairly represent the question of profit and loss in the cultivation of tobacco in 1879 in the various states of the Union. It will be observed that Tennessee stands lowest in the column which indicates profit. This is due to the peculiar condition of the tobacco market at the time the census was taken. Stocks of tobacco had accumulated, until prices coincided very nearly with the cost of production. All other states growing tobacco for exportation produced also some types peculiarly suited to the requirements of the domestic manufacturer, which brought good prices and elevated the general average of prices for such states. The profits in growing tobacco in Kentucky came from the production of the White Burley and yellow wrapper; in Illinois, from the production of the seed-leaf; in Missouri, from the production of sweet fillers and White Burley; and in Virginia from the production of yellow wrappers, bright "smokers," and sun-, air-, and fire-cured fillers. In consequence of the low scale of prices for shipping-leaf, and the margin for profit being reduced to such a low point, Tennessee, Missouri, Illinois, Indiana, Maryland, and other states growing tobacco mainly for exportation, show relatively a diminished production. On the other hand, all those states which have grown types suitable for domestic consumption, have generally ascended rapidly in the rank of production. Pennsylvania, which was twelfth in rank in 1870, takes the third rank in 1880. Ohio passes from the fifth to the fourth, while Maryland and Tennessee descend from the fifth and third rank respectively to the seventh and fifth, and Missouri passes from the seventh to the ninth rank.

Profits in the culture of tobacco have been in direct proportion, first to its suitability to domestic consumption; and, secondly, to the amount of fertilization practiced by the growers in its cultivation.

Ninety-four per cent. of all the product grown for market in 1879, north of the parallel of 39° 44', was classed as seed-leaf tobacco; and eighty-four per cent. of the whole product of that class was grown north of the same line. The amount of seed-leaf grown in the United States reached nearly twenty per cent. of the entire product.

NOTE.—No comprehensive figures of the business of the railways of the United States are attainable prior to the above. And even these tables are the fruit of private enterprise, in compiling from the official annual reports of each road the results of the traffic as shown above; and including for the year 1880 the operations of companies running 84,225 miles of railway out of a total of 93,671 miles. No department of the Federal Government has been invested with authority to require returns of railway operations, nor are there State officers charged with such duties except in a very few of the States.

SUMMARY STATISTICS OF THE UNITED STATES RAILWAYS IN 1880.—AVERAGES.

For each 100 miles of railroad in the United States there are 26.09 miles of second track, sidings, etc.; 21.3 locomotives; 15.1 passenger cars; 5.68 baggage, mail and express cars; and 640.3 freight cars of all kinds.

The capital stock aggregates to each 100 miles, \$3,032,038.

Funded debt to each 100 miles, \$2,840,033.

Floating debt to each 100 miles, \$192,923.

Total cost of construction and equipment each 100 miles, \$5,525,211; equal to about \$55,252 per mile of completed road.

Gross earnings per mile, \$7,306.64.

Operating expenses per mile, \$4,276.74.

Net earnings per mile, \$3,029.90.

Interest paid on bonds per mile, \$1,280.69.

Dividends paid on stock per mile, \$915.58.

Ratio of interest paid to total funded debt, 4.50 per cent.

Ratio of dividends to aggregate capital stock, 3.02 per cent.

*Other estimates make the coal fields of the United States, reckoning the Permian and tertiary coals, to embrace an area of over 800,000 square miles. But all estimates of their extent are as yet conjectural, and a very large portion of their actual area contains no workable coal.

Statement showing the Mileage of Lines and Wires, Number of Offices and Traffic of the WESTERN UNION TELEGRAPH COMPANY for each year, from June 30, 1866, to June 30, 1881.

The greatly increased mileage since 1880 is principally due to the fact, that in 1881, the Western Union Telegraph Company absorbed by purchase, all the lines of the American Union and the Atlantic and Pacific Telegraph Company, the former having previously in operation over 12,000 miles of line, and the latter 8,706 miles.

THE DOMINION TELEGRAPH COMPANY, operating almost wholly in Canada, had 5,000 miles of line in 1881, owned and operated by the Western Union Telegraph Company, (not included in above mileage.)

Besides the above, there are many new lines of Telegraph, which have complied with the United States Telegraph Act of 1866, and are operating wires with or without connection with Railway Companies.

THE MUTUAL UNION TELEGRAPH COMPANY, of the United States, established in 1881, has about 1,800 miles of line, and 50,000 miles of wire, and is extending its lines North and South, operating already from Boston to Chicago, St. Louis, Washington, etc.

THE BALTIMORE AND OHIO RAILROAD TELEGRAPH, has lines co-extensive with its railway system and branches, constituting in 1881, over 2,500 miles of line, 16,000 miles of wire, and 200 offices.

THE AMERICAN RAPID TELEGRAPH COMPANY, New York to Boston, Philadelphia, Baltimore and Washington, has over 500 miles of line, 1,500 miles of wire, and 60 offices.

THE INTERNATIONAL OCEAN TELEGRAPH COMPANY, of New York, (Inland Line,) has 502 miles of line, and 574 miles of wire.

The aggregate mileage of Telegraph Lines in the United States open for public business, exceeds 120,000 miles, besides Railway, Government, private and telephonic lines, length not ascertainable.

TELEPHONES.

THE AMERICAN BELL TELEPHONE COMPANY, (Boston,) had in use by its licensees, January 1, 1881, about 138,500 Telephones, and 393 Telephone Exchanges, in various Cities of the United States. The aggregate mileage of Telephone wires operated by these, was 28,336.

The aggregate number of Telephones in use in all the cities of the country, including those of competing companies, is much greater than the above.

The extent in mileage of telegraph wires put up for Telephone use in the United States, is estimated at 60,000 miles.

The number of communications by Telephone, has been roughly estimated at about 80,000,000 *per annum* in the Exchanges of the United States.

NOTE.—These statistics are not in most cases based upon a census of illiteracy, which few nations have provided for in systematic form. They are to be regarded rather as an attempt to approximate the proportions ignorant of the arts of reading and writing, from such data as exist concerning soldiers, the signing of marriage registers, etc., than as exact statistics of illiteracy.

OUR PUBLIC LAND SYSTEM.

THE public lands of the United States which are still undisposed of and open to settlement lie in nineteen States and eight Territories. In each case, except Ohio, Indiana, Illinois, the Indian Territory and Alaska, land offices are established, in charge of an officer known as Register of the Land Office, where the records of all surveyed lands are kept, and all applications concerning lands in each district are filed and inquiries answered. The public lands are divided into two great classes. The one class have a dollar and a quarter an acre designated as the minimum price and the other two dollars and a half an acre, the latter being the alternate sections, reserved by the United States in land grants to railroads, etc. Titles to these lands may be acquired by private entry or location under the homestead, preëemption and timber-culture laws; or, as to some classes, by purchase for cash, in the case of lands which may be purchased at private sale, or such as have not been reserved under any law. Such tracts are sold on application to the Land Register, who issues a certificate of purchase, the receiver giving a receipt for the money paid, subject to the issue of a patent, or complete title, if the proceedings are found regular, by the Commissioner of the General Land Office, at Washington.

Entries under land warrants (given mostly for military services under acts of Congress), have fallen off very largely by the absorption of such warrants, there having been no military bounty land warrants provided for on account of services in the late war.

Entries under the preëemption law are restricted to heads of families, or citizens over twenty-one, who may settle upon any quarter section (or 160 acres), and have the right of prior claim to purchase on complying with certain regulations.

The homestead laws give the right to one hundred and sixty acres of a dollar-and-a-quarter lands, or to eighty acres of two-dollar-and-a-half lands, to any citizen or applicant for citizenship over twenty-one who will actually settle upon and cultivate the land. This privilege extends only to the surveyed lands, and the title is perfected by the issue of a patent after five years of actual settlement. The only charges in the case of homestead entries are fees and commissions, varying from a minimum of \$7 to a maximum of \$34 for the whole tract entered, according to the size, value or place of record.

Another large class of free entries of public lands is that provided for under the timber-culture acts of 1873-78. The purpose of these laws is to promote the growth of forest trees on the public lands. They give the right to any settler who has cultivated for two years as much as five acres in trees to an eighty-acre homestead, or, if ten acres, to a homestead of one hundred and sixty acres, and a free patent for his land is given him at the end of three years instead of five. The limitation of the homestead laws to one hundred and sixty acres for each settler is extended in the case of timber-culture so as to grant as many quarter sections of one hundred and sixty acres each as have been improved by the culture for ten years of forty acres of timber thereon, but the quarter sections must not lie immediately contiguous. The fees and commissions in timber-culture entries vary from \$13 to \$18 for the tract.

THE COPYRIGHT LAW OF THE UNITED STATES.

EVERY applicant for a copyright must state distinctly the name and residence of the claimant, and whether right is claimed as author, designer, or proprietor. No affidavit or formal application is required.

A printed copy of the title of the book, map, chart, dramatic or musical composition, engraving, cut, print, or photograph, or a description of the painting, drawing, chromo, statue, statuary, or model or design for a work of the fine arts, for which copyright is desired, must be sent by mail or otherwise, prepaid, addressed, "LIBRARIAN OF CONGRESS, WASHINGTON, D. C." This must be done before publication of the book or other article.

A fee of 50 cents, for recording the title of each book or other article, must be inclosed with the title as above, and 50 cents in addition (or one dollar in all) for each certificate of copyright under seal of the Librarian of Congress, which will be transmitted by early mail.

Within ten days after publication of each book or other article, two complete copies must be sent prepaid, or under free labels, furnished by the Librarian, to perfect the copyright, with the address, "LIBRARIAN OF CONGRESS, WASHINGTON, D. C."

Without the deposit of copies above required the copyright is void, and a penalty of \$25 is incurred.

No copyright is valid unless notice is given by inserting in every copy published, "Entered according to act of Congress, in the year —, by —, in the office of the Librarian of Congress, at Washington," or, at the option of the person entering the copyright, the words: "Copyright, 18—, by —."

The law imposes a penalty of \$100 upon any person who has not obtained copyright who shall insert the notice "Entered according to act of Congress," or "Copyright," or words of the same import, in or upon any book or other article.

Each copyright secures the exclusive right of publishing the book or article copyrighted for the term of twenty-eight years. Six months before the end of that time, the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two years in all.

Any copyright is assignable in law by any instrument of writing, but such assignment must be recorded in the office of the Librarian of Congress within sixty days from its date. The fee for this record and certificate is one dollar.

A copy of the record (or duplicate certificate) of any copyright entry will be furnished, under seal, at the rate of fifty cents.

Copyrights cannot be granted upon Trade-marks, nor upon Labels intended to be used with any article of manufacture. If protection for such prints or labels is desired, application must be made to the Patent Office, where they are registered at a fee of \$6 for labels and \$25 for trade-marks.

During the year 28,740 new names were added to the roll, 1,344 of which had formerly been on the roll, but dropped for various causes. During same period the names of 10,712 pensioners were dropped. The salaries of pension agents under the existing laws are \$4,000 per annum, and an extra allowance or perquisite of 15 cents for each pension voucher above 4,000 issued in any year. Out of this, however, pension agents must pay all clerk hire, office rent, postage, and contingent expenses of their offices.

NOTE 1.—The one and two-year notes of 1863, and the compound-interest notes, though having a legal-tender quality for their face-values, were in fact interest-bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and, since maturity, those presented have been converted into other interest-bearing bonds, or paid for in cash, interest included.

NOTE 2.—The amount of fractional silver in circulation in 1860, 1861, and 1862, cannot be stated. The amounts stated for 1876, 1877, 1878, and 1879, are the amounts coined and issued since January, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation.

NOTE.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

2.—The statement of population for 1860, 1870, and 1880 is by enumeration, and for other years from estimates by E. B. Elliott, of this department.

3.—The slight increase of the interest charge for 1878 is owing to the interest charge on bonds sold for resumption, less the amount saved by refunding at lower rates.

4.—The Temporary Loan, per Act of July 11, 1862, is included in the 4 per cents. from 1862 to 1868 inclusive, with the exception of the amount outstanding for August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., and was redeemable on ten days' notice after thirty days, but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.

The import values are invoice prices in gold at place of shipment, and the export values are also in specie. From 1862 to 1878, representing the period of suspension of specie payments, an additional column on the right exhibits the currency value of domestic exports, added to the specie of domestic production exported.

NOTE.—The rule observed in the above table, of including only specific articles, which pay as much as \$100,000 revenue into the Treasury, of course omits a great many minor articles of commerce, yielding little revenue. To print the whole in detail would occupy too great space, but the scheme followed sums up the aggregate of each great class of imported commodities, with the duties collected, and the average per centage of duty thereon.

As to the much-controverted question of the amount of the precious metals mined which is to be deducted from the circulation on the account of use in the arts, the Director of the Mint, after careful and extended inquiries, in 1879, and 1880, came to the conclusion that the annual consumption of gold and silver, in all forms, in the United States, is not less than \$10,000,000 of gold and \$5,000,000 of silver.

The balance of exchanges in the precious metals, which had been steadily against the United States ever since 1861, has been changed during 1879-81. The imports of gold and silver coin and bullion from July 1st, 1879, to July 1st, 1881 amounted to the sum of \$167,060,041.

Brief History of the Standard Silver Dollar.

Authorized to be coined, Act of April 2, 1792. Weight, 416 grains, standard silver; Fineness, 892.4: equivalent to 371½ grains of fine silver, with 44½ grains alloy of pure copper.

Weight changed, Act of January 18, 1837, to 412½ grains, and fineness changed to 900, preserving the same amount of pure silver—371½ grains, with 1-10 alloy. Coinage discontinued, Act of February 12, 1873.

Total amount coined, from 1792 to 1873, \$8,045,838.

Coinage revived, two million dollars per month required to be coined, and issue made legal-tender for all debts, public and private, Act of Feb'y 28, 1878.

Total amount coined, February 28, 1878, to Nov. 1, 1881, \$100,672,705.

GOLD AND SILVER of Domestic Production Deposited at the Mints and Assay Offices from their Organization, in 1793, to the Close of the Fiscal Year ended June 30, 1881.

From the Annual Report of the Director of the Mint, December, 1881.

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SIX YEARS—1825-1880.

(Compiled from the Reports of the Secretary of the Treasury for 1863 and 1873, the Commercial and Financial Chronicle, Reports of the N. Y. Chamber of Commerce, and the N. Y. Shipping List and Price Current.)

NOTE.—In the American Almanac and Treasury of Facts for 1878, pp. 278-9, appeared a table of prices compiled on the basis of the average price of each article in New York, the 1st of January of each year. Such a table, however useful, fails to give the data which are important in forming a judgment of the whole range of prices for each year. The following table, carefully compiled from the sources indicated, takes the prices of the twelve months in each year, selecting the highest and lowest quotation for each article. It is to be understood, where no mention of quality is made, that the price quoted is for the cheapest grade of each commodity.

The prices are those of the New York market.

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SIX YEARS--1825-1880.

These tables of prices have been compiled upon the basis of selecting the leading articles entering into general consumption, whether as semi-luxuries or the necessities of life. The prices quoted being those of the New York market, still wider variations would in some cases have been exhibited if other markets, near the centres of production of some leading staples, had been collated with these. The tables exhibit the violent fluctuations of the civil war period in the United States--1861-65--and the years of expansion immediately succeeding, in contrast with the general decline of the past few years, which has not yet reached, however, save in a few articles, the minimum prices which prevailed before the war.

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SIX YEARS—1825-1880.

(Compiled from the Reports of the Secretary of the Treasury for 1868 and 1873, the Commercial and Financial Chronicle, Reports of the N. Y. Chamber of Commerce, and the N. Y. Shipping List and Price Current.)

NOTE.—In the American Almanac and Treasury of Facts for 1878, pp. 278-9, appeared a table of prices compiled on the basis of the average price of each article in New York, the 1st of January of each year. Such a table, however useful, fails to give the data which are important in forming a judgment of the whole range of prices for each year. The following table, carefully compiled from the sources indicated, takes the prices of the twelve months in each year, selecting the highest and lowest quotation for each article. It is to be understood, where no mention of quality is made, that the price quoted is for the cheapest grade of each commodity.

¹ In Indiana, a constitutional amendment, changing election day from October to November, was adopted, March, 1881, by popular majority.

² In Ohio and a few other States, where the Legislative sessions are biennial, the Legislature holds "Adjourned Sessions," practically amounting to annual meetings.

³ The Rhode Island Legislature is required to meet annually the last Tuesday in May, at Newport, and an adjourned session to be holden annually in Providence.

⁴ Wisconsin has changed the sessions of the Legislature from annual to biennial, to commence after the session of 1882.

By Act of Congress, March 1, 1792, amended in 1845, a uniform day of election for Electors of President and Vice-President is fixed for all the States—being the Tuesday after the first Monday in November, every fourth year after a President has been electe

FOREIGN COUNTRIES.

NOTE.—For the rulers or heads of principal nations, see page 109.

Argentine Republic.

THIS country has an area as great as all Central and Western Europe combined (about 1,619,500 sq. miles), and a population of 1,768,681 by census of 1869, now estimated at 2,500,000. It abounds in remarkably fertile plains, covered by luxuriant vegetation, with rich alluvial soil four or five feet thick, formed by decay of luxuriant vegetation.

It consists of 14 provinces: the province of Buenos Ayres is the most populous, having over half a million population, with a capital city—Buenos Ayres—of 200,000, estimated for 1878. The vast extent of Indian country is very sparsely populated. The population of Buenos Ayres and the riverine provinces is largely European, and immigration has increased enormously of late years, attracted by the fertility of the soil and the prosperity and free institutions of the Republic. By the last census there were 212,000 people of foreign birth, occupying 2,000,000 acres of land, in the province of Buenos Ayres alone, and owning 35 million sheep, besides multitudes of horned cattle, buildings, etc., acquired in a few years by men who, on arrival, did not own a dollar.

Eminently a pastoral country, with about 18 million horned cattle, and 100 million sheep, the exports are largely of wool, hides, and tallow. The premium on gold varied from 30 to 33 per cent. in 1878. The exports in 1880 were \$68,497,423, and the imports \$44,660,204. Twelve lines of steamers run to Europe, the passage occupying 29 days. The Republic has nearly 1500 miles of railway, and 10,000 miles of telegraph, besides an Atlantic cable communicating with London.

The revenue for 1880 was \$19,594,305, derived almost wholly from import and export duties. The expenditure in 1880 was \$17,193,284, and the total national debt \$57,068,979.

The government is a Federal Republic, modelled on the Constitution of the United States, except that the ministry is responsible to Congress, an adverse vote in the Senate and House leading to the formation of a new Cabinet. The laws are the same for all, native or foreign; immigrants are free to naturalize themselves as Argentines or to maintain their foreign nationality.

Austria.

Called, since 1867, the Austro-Hungarian Monarchy (240,000 square miles; population in 1880, 37,741,413), comprises five countries, each bearing the name of kingdom. Its largest city and capital, Vienna, had 726,105 inhabitants in 1880.

The population of Austria embraces several distinct races, the most numerous being the German, numbering 9 millions, or 25 per cent. of the whole.

The various Slavonic races number about 16½ millions, or 46 per cent., Poles, Croats, Serbians, Czechs, Moravians, etc. The Magyars, or Hungarians, number 5½ millions, or 16 per cent.; the Wallachians, nearly 3 millions; the Jews, 1,100,000; the Italians 515,000; and Gypsies, 140,000.

About two-thirds of the people profess the Roman Catholic religion. Education receives great attention, and is open to all at small cost, or even gratuitously. In Austria, all children from six to twelve are bound to attend the common schools, and 76 per cent. actually do so. There are 92 gymnasia, or higher schools, and 6 universities, while Hungary has 143 gymnasia, and one university.

The majority of the people pursue agriculture. About 30 per cent. are engaged in trade or manufactures. The productive land of Austria is estimated at 89 per cent. of its area; Hungary 84 per cent. The great crop is grain, an annual yield of over 400 million bushels. For commerce, Austria is not favorably situated, being an inland country. The principal sea-port is Trieste, on the Adriatic. Total imports about 308 million dollars, and exports 340 million dollars.

The legislative body, or Reichsrath, consists of a House of Lords nominated by the Emperor, consisting partly of life members and partly of hereditary nobles; and a House of Representatives, 363 members, elected by all citizens who possess a small property qualification.

Hungary has a Reichstag, consisting of a House of Magnates for high officers and peers of the kingdom, and a House of Representatives elected for three years. The sovereign (the Austro-Hungarian Emperor) is styled king in Hungary.

In the imperial finances Austria pays 70 per cent. and Hungary 30 per cent. toward the expenses of the empire. The budget of 1881 summed up: receipts, 58 million dollars; expenditures, about the same. The budget of Austria proper amounted to 205 million dollars in 1881; the expenditures to \$179,500,000. The Hungarian budget for 1881, including receipts, \$132,000,000; and expenditures, \$143,500,000. The public debt of the empire was \$1,589,600,000.

The army, on a peace footing, consisted in 1881 of 289,190 men and 16,635 officers. Military service is compulsory for ten years.

The navy in 1881 consisted of 68 vessels, 11 of which were ironclads, and 30 steam vessels, with 320 guns.

Belgium.

Belgium is a kingdom of Western Europe; area, 11,378 square miles; population, 1878, 5,476,668; capital, Brussels, 184,598. Most of the people are Roman Catholics, there being about 15,000 Protestants and 3,000 Jews. Revenue, 1880, \$64,501,284; expenditures, \$55,763,710.

The public debt in 1880 was \$351,967,293. Imports in 1880, 452,265,000; exports, \$428,149,065. Army, peace footing, 46,383 men.

Railways in operation, 1879, 2672 miles, two-thirds of which were owned and managed by the government. Miles of telegraph, 1878, 3144; postoffices, 583; letters carried, 63,641,094; postal cards, 11,671,296; journals, 77,938,000. The great interests are agriculture and manufactures, Belgium being one great workshop. Education is zealously promoted by the government, but, notwithstanding abundant primary school provisions, only 58 per cent. of the population above 7 years of age were able to read and write in 1866.

Bolivia.

Bolivia, a republic of South America, named in honor of Bolivar, (536,200 square miles; population 1878, estimated, 2,080,000, to which should be added about 245,000 wild Indians), is divided into 9 departments, each having a distinct governor. The government is popular in form, three legislative chambers being elected for four years, eight years, and for life. The president is elected for life by a majority of the collective legislature. The administration belongs wholly to the ministry, which is responsible to the Senate. Religion is free, the Roman Catholic being the prevailing form.

The public debt in 1879 was \$30,000,000. The revenue was \$2,929,574 in 1879, one-fifth of which was derived from customs, about as much from Indian tribute, and half as much from the sale of guano; expenditure, \$4,505,504. Imports in 1879, \$5,000,000; exports, \$5,600,000.

Bolivia abounds in high plateaus, constituting granaries of wheat production, has much valuable timber, and the lowlands are the seat of tropical forests and swamps, with every variety of climate, and two or more zones of production. It produces coffee, cotton, sugar-canes, garden vegetables and fruits in surprising luxuriance and abundance. Western Bolivia contains the highest mountains of the two Americas, with frequent volcanoes. The great Cordillera range, reaching up into the region of eternal ice and snow, culminating in the peak of Sorata, 24,800 feet high. The silver-mines of Potosi, world-famous for richness of production, have yielded over \$1,600,000,000 since 1545. Bolivia is poorly supplied with roads, and railroads are as yet almost unknown, great natural difficulties being presented to their construction.

Brazil.

Brazil, the only kingdom in America, (area, 3,287,964 square miles; population, 1872, 10,108,291,) is the largest of the South American countries. First occupied by the French in 1558, the country early fell into Portuguese possession, afterwards passing under the Spanish rule, but reverting to Portugal in 1640.

The legislative power is vested in a Senate of 58 members elected for life, and a Chamber of Deputies, 122 members, chosen for four years by indirect suffrage, involving a property qualification.

The executive power is vested in the emperor, and his ministers and secretaries of state. For administrative purposes, the Brazilian empire is divided into twenty provinces, comprising 642 municipalities, each having a council chosen directly by citizens possessed of an annual income of \$112.

The public debt of Brazil is about \$407,000,000, of which \$85,000,000 consists of paper money issues. The revenue for 1880 was \$67,423,412, more than one-half of which was customs duties, and one-sixth from export duties, the taxes in both these forms on commodities being very heavy. The expenditure in 1880, was \$59,762,289.

The army consists of 15,304 men, raised to 32,000 on a war footing.

The naval force embraces 41 steam vessels, with 230 guns, and 4,136 seamen.

Free public schools supported by the state exist throughout the empire, and in some of the provinces instruction is compulsory.

Brazil has about 200 newspapers, of which six dailies are published at the capital, Rio de Janeiro.

The Roman Catholic religion is established, other forms being tolerated, though they may only be practised privately, and dissenters enjoy civil rights, except that of election to the General Assembly.

Brazilian commerce is flourishing, and there are 18 lines of steam vessels, receiving annual subsidy from the state to the amount of \$750,000; besides this, the North American steamship line, running between Brazil and New York, enjoyed a Brazilian subsidy of \$100,000 annually. The imports in 1880 aggregated \$81,762,900, and the exports, chiefly of coffee, hides, and sugar, \$102,029,250. By a decree of 1867, the great river Amazon was opened to the trading ships of all nations. In 1874, a submarine telegraph cable was completed from Europe. The roads of Brazil are wretched, but railways have been constructed to the number of over twenty, and are being rapidly extended by the state, as well as by private enterprise.

THE DOMINION OF CANADA.

Compiled from the Sessional Papers of the Dominion of Canada for 1881, and other official sources.

The Dominion of Canada forms (since 1867) a confederate government, embracing the British North American Provinces of Ontario, Quebec, New Brunswick, Nova Scotia, Manitoba, British Columbia, North-west Territory, Vancouver's Island, and Prince Edward Island. It has a representative parliament meeting annually at Ottawa, the capital. The members of the Senate, 77 in number, are nominated for life by the summons of the Governor-General. The House of Commons, with 206 members, is elected by the people for five years, the right of suffrage being subject to a property qualification. The Governor-General (appointed in 1878) is the Marquis of Lorne, salary \$50,000. The funded debt in 1880 was \$199,125,323, drawing interest at an average of 4.37 per cent., having increased to this amount from 93 millions in 1867. The revenue for the fiscal year ending June 30, 1880, was \$23,307,406, derived from the following principal sources: customs, \$14,071,943; excise, \$4,232,427; public works, including railways and canals, \$2,167,401; post office, \$1,282,498. The expenditure for 1880 was \$24,850,634.

The chief items of export were in 1880:

Agricultural products.....	\$32,000,000	Fisheries.....	\$6,500,000
Animals, and produce of.....	18,500,000	Manufactured articles.....	5,000,000
Woods, timber, lumber, etc.....	17,000,000	Products of the mines.....	3,000,000

Of the imports 34½ millions came from Great Britain, 29 millions from the United States, and \$24,400,000 from all other countries. Leading imports were: cotton manufactures, 8 millions; flour and grain, 13 millions; iron and steel manufactures, 10 millions, and woolen manufactures, 6 millions.

Of the exports, \$45,846,062 went to Great Britain, 33 millions to the United States, and 9 millions to all other countries. The Canadian lumber trade is of great extent and value, and from 94 to 96 per cent. of its aggregate exports go to the United States.

The merchant shipping of the Dominion, Jan. 1, 1880, numbered 7,377 vessels, measuring 1,311,218 tons, and is steadily increasing. The canals of Canada are extensive and profitable, and are managed by the Government. The Welland canal charges 20 cents per ton on grain and other bulky freights, and 2½ cents a ton on each vessel.

The Canadian banks held \$67,000,000 in deposits, with a note issue of \$17,500,000, coin, \$5,500,000, and bills discounted, \$135,000,000.

The total money value of the fisheries within the Dominion of Canada has been as follows, for the past ten years:

1870.....	\$ 6,577,391 72	1876.....	\$11,012,302 39
1871.....	7,573,199 85	1877.....	11,422,501 77

1874.....	11,681,886 20	1880.....	14,499,980 00
1875.....	10,350,385 29		

The Census of the Dominion in 1881 showed a population of 4,352,080, against 3,686,596 in 1871, a gain of 18 per cent.

The Indian population of Canada, as reported by the Superintendent of Indian Affairs in 1877, was 99,650.

The average of duty on all imported commodities (dutiable and free) was 16.34 per cent. in 1880.

Chili.

Chili, a republic of South America, area 124,084 square miles, population, 1878, 2,400,396, to which should be added omissions, 10 per cent, and about 50,000 Indians, is a mountainous country subject to frequent earthquakes. It has almost every variety of climate, its long narrow territory extending from the hot deserts near the equator to the cold and wet region within twelve degrees of the Antarctic Circle. One-quarter of the country is near the level of the sea, while the great Andes range of mountains rise far above the line of perpetual snow, their mean elevation being 11,830 feet, and the highest peak (Aconcagua) 22,427 feet.

Chili, originally a Spanish settlement, became independent in 1810-'17. By the constitution of 1833 the Legislative power is in a National Congress composed of 37 members, elected for six years, and a Chamber of Deputies, 109 members, for three years. Suffrage is universal to citizens able to read and write and paying a small annual tax.

The executive power resides in a President elected for five years, a council of State, and five cabinet ministers, having salaries of \$6,000 each.

The national debt in 1879 amounted to \$79,452,490, mostly contracted in England for the construction of railways. The revenue for 1879 was \$27,693,087, one-half derived from customs and monopolies; and the expenditure \$24,777,380. The commerce of Chili is considerable, the exports being \$37,771,440 in 1878, and the imports \$22,740,000, nearly one-half the commerce being with Great Britain.

Agriculture flourishes, although about 82 per cent of the entire surface is desert, pasture, or forests, with only 18 per cent arable land. Wheat is the most important product, the crop averaging ten million bushels, two-thirds of which is exported.

Chili is rich in gold, silver, and especially in copper.

The army, reduced in 1875 to 3,500 men, was largely increased in 1879 on account of the Peruvian war.

The navy consists of 20 to 22 steam vessels, manned by 1,800 men.

Education is largely aided by government, which supports 810 schools through the country, besides lyceums and the University of Chili, an invaluable government institution, with 700 students, 37 professors, and free instruction.

The Roman Catholic religion is recognized by the constitution, but the public profession of other forms is tolerated.

China.

China, an immense empire in Asia, area 4,560,107 square miles, population 435,000,000 (estimated), has of late years opened diplomatic and commercial intercourse with other nations. It includes Tibet, Mongolia, and Manchuria, besides China proper; the country abounds in numerous rivers, forming the chief highways of the empire. The government is a patriarchal despotism, the Emperor being an autocrat, whose sway is limited only by the sacred right of rebellion. Its vast and productive territory is larger than that of any nation except Russia, and its civilization, the most ancient in the world, has peculiarities unknown to the civilizations of Europe or America. The exclusiveness which long made China a sealed book is slowly giving way, and the empire now sends its ministers to the United States, England, France, Germany, Russia, Spain, the West Indies, and Japan; but the Chinese government still refuses to open the empire to railroads and telegraphs, and destroyed in 1877 the first and only railway laid in the empire; and only 14 of its numerous ports are open to foreign trade. The imports in 1878 were \$70,804,027, and the exports \$87,172,179; about one-third of the commerce is with Great Britain; silk and tea make up three-fourths of the exports, while opium and cotton goods constitute two-thirds of the imports. No certain information regarding Chinese finances exists, but the revenues were estimated in 1878 at \$121,482,000; the public debt is of unknown amount, being wholly domestic, except one foreign loan of \$3,135,000 at 8 per cent, recently contracted, and guaranteed by the customs receipts.

The army of China has 270,000 men organized after the European custom, while on paper the military force is set down 800,000 Chinese and 271,000 Manchocs. The navy embraces 88 vessels.

Colombia.

Colombia (the United States of) is a confederated republic in South America, including a large part of what was called New Granada; area 320,635 square miles; population, 1,870,291,323, besides about 100,000 wild Indians. Its present political organization dates from 1863. The largest city is Bogota, the capital, with 50,000 inhabitants, and Panama has about 20,000.

The legislative power resides in a Senate of 27 members, and a Representative Chamber of 61, elected by general suffrage. The executive power is exercised by a President chosen for two years by the people of the different States, and by four ministers. The revenue is very small, amounting in 1879 to only \$4,910,000, two-thirds of which was from customs. The expenditure was \$8,634,571 in 1879. The public debt amounted to \$19,971,219 in 1879, imports in 1879 to \$10,787,634; exports, \$13,711,511.

Coffee, cotton, tobacco, and cinchona bark form a large part of the exports, and agriculture is the leading industry. Only two railways are in operation, the Panama line across the Isthmus, 46 miles, being the principal. Telegraphs, 1,520 miles. Letters carried by post-office, 368,254.

Colombia has no navy, and the army in time of peace musters only 3,000 men. Education has been recently much improved, the law of 1870 transferring it from the hands of the clergy to the State, and requiring compulsory instruction, the general government subsidizing the States to maintain schools. Religious freedom prevails, there being no State church, though the predominant religion is Roman Catholic.

Costa Rica.

Costa Rica, the most southern republic of Central America, area 21,495 square miles, population in 1874, 186,000, mostly of Spanish descent, with very slight foreign elements. It is divided into six provinces, the government being vested in a President elected for 4 years, two Vice-Presidents and four ministers. The legislative power is in a Congress of Deputies chosen for 4 years.

The revenue for fiscal year 1878, \$3,819,211, one-third of which is derived from the monopoly of tobacco and brandy by the government, the rest from customs and various taxes. The expenditure was \$3,904,657, and the public debt \$12,000,000. The exports of 1878 were \$6,187,062, of which coffee alone amounted to about \$4,450,000; the imports were \$3,116,290, chiefly manufactures from England.

There is no standing army except 900 soldiers of the militia, which comprises 16,370 men, or all between the age of 15 and 30. The State Religion is Roman Catholic, but full religious liberty is guaranteed by the Constitution. The soil is extremely fertile; there are vast forests of mahogany, ebony, Brazil-wood, and India-rubber trees, and the climate fosters almost all the fruits of the tropic and temperate zones, about 1,100 square miles being under cultivation. Railways, 36 miles; telegraphs, 193 miles.

Cuba.

Cuba, a colony of Spain, in the West Indies, having 72,000 square miles; population, 1876, 1,414,508, half of whom are blacks, and 8 per cent. slaves. The island is governed by a Captain General, appointed by the Spanish crown. Its great staple is sugar, of which 620,000 to 800,000 tons are annually exported, two-thirds of it to the United States, besides 4,000,000 to 5,000,000 gallons of molasses.

Denmark.

Denmark, (area 14,553 square miles; population, 1878, 1,969,454), is a constitutional kingdom, occupying an almost insular position between the North Sea and the Baltic. The climate is like that of Scotland in the same latitude, the mean temperature of the year being 47° at Copenhagen. The constitutional charter of 1849, vests the legislative power in the Rigsdag, consisting of a Folkething, 102 members, and a Landsting, 66 members (1860 charter amended in 1866). The Folkething are elected for three years by universal suffrage, and the Landsting for eight years by electoral districts, except 12 members who are nominated for life by the King. King, Christian IX; Minister of Finance, J. B. S. Estrup; Minister of the Interior, E. V. R. de Skeel; Minister of Justice, J. M. V. Nellesmann; Minister of Worship and Public Instruction, J. F. Seavenius; Minister of Foreign Affairs, Baron de Rosenørn-Lehn; Minister of War and Marine, Comm. N. F. Raven. The budget for 1880-81, including receipts, \$12,800,000, of which no less than \$8,300,000 from indirect taxes, and \$2,300,000 from direct taxes. The expenditure was \$11,200,000, one-fourth of which was on account of the national debt, which amounted in 1880 to \$46,798,190.

The army (recruited by conscription) embraces 35,727 men, besides a reserve of 15,258. The navy in 1876 included 33 steam vessels with 230 guns, and 29 sail vessels.

The commerce of Denmark in 1876 comprised \$53,744,810 imports, and \$42,576,810 exports, the exports chiefly grain and provisions.

There are 968 miles of railway, two-thirds of which are operated by the State. The government telegraph embraces 1,650 miles, which transmitted a total of 940,655 dispatches in 1876. The postal system 1876 transmitted 20,088,138 letters and 19,318,353 newspapers.

The established church of Denmark is the Lutheran—Protestant—Roman Catholics are however long since tolerated in Scandinavia.

By the census of 1870 there were, Lutherans, 1,777,000; Jews, 4,300; Baptists, 3,200; Mormons, 2,200; Roman Catholics, 1,800.

Education is highly developed by the compulsory system, and almost all the lower classes can read and write.

Ecuador.

Ecuador, a South American republic, traversed by the equator, from which it takes its name, area 248,312 square miles, population in 1878, 1,146,000, besides about 200,000 Indians; capital, Quito, has about 80,000 people; Guayaquil, the principal seaport, 26,000. Quito is the loftiest inhabited city, 9500 feet above the sea. The country is traversed by the two vast mountain ranges of the Cordilleras, reaching to a height of 18,000 feet, full of noble volcanic summits, and divided by magnificent valleys. Cotopaxi and Chimborazo are capped with perpetual snow.

The government is vested in a President, chosen by 900 electors appointed by popular vote, the Vice-President, who is Minister of the Interior, and three other cabinet officers. The Congress consists of a Senate of sixteen, and a House of thirty members.

chosen by popular suffrage. The army has only 1,200 men, and the navy three small steamers. The finances, which are in a state of chronic deficit, represented in 1879 revenues (half derived from customs) amounting to \$1,853,600, expenditures \$2,688,000. The public debt in 1879 was \$18,350,400.

Roads are almost unknown in Ecuador, being mostly mere mule tracks, impassable for several months of the year; all transportation of goods is on the backs of mules, wheeled conveyances being almost unknown. There are thirty miles of railway.

The principal article of export is cacao, amounting to \$4,539,641 in 1879, out of a total of \$5,371,912; the imports were about \$6,000,000.

The sole religion professed is the Roman Catholic, and 10 per cent. of the Church revenue belonging to the State goes to the Pope as an annual offering. Education is in the hands of the clergy, with about 600 schools, one university and several colleges.

Egypt.

Egypt, a dependency of Turkey, situated in northern Africa; area, 1,152,948 square miles; population in 1877, 17,419,980, (estimated,) including Nubia and Soodan. Imports 1879, \$32,749,664; exports, \$64,916,017; more than half the commerce is with Great Britain. The executive power, which is absolute, is in the hands of the Khedive, a prince tributary to the Sultan. The largest city is Cairo, 349,883 inhabitants. Revenue for 1879 was estimated at \$42,683,000 and the expenditures at \$51,260,000. Public debt \$411,820,700. Army, 15,000 men; navy, 14 vessels. Railways in 1879, 1,500 miles; telegraphs, 5,260 miles. Letters carried by post in 1877, 2,648,000; journals, 728,949.

France.

The republic of France, (204,030 square miles; population in 1876, 36,905,788,) dates its present constitution and government from the 4th of September, 1870, when the Second Empire, under Napoleon III, came to an end. The legislative power is vested in a *Corps Legislatif*, consisting of a Senate of 800 members, 225 of whom are chosen for 9 years by the Departments and the colonies, and 75 for life by the National Assembly; and a Chamber of Deputies, now 532 members, elected by universal suffrage, one deputy to each 100,000 inhabitants. Salary of Senators and Deputies, \$1,800. Every Frenchman of 21 years has the right to vote, and there were in 1876, 9,948,070 legal voters, a ratio of one voter to every four inhabitants nearly.

The executive power is vested in a President, elected for seven years by a joint assembly of the Senate and the Chamber of Deputies; salary, \$120,000, and \$32,480 for household expenses; he has power to dissolve the Chamber of Deputies upon the advice of the Senate. The ministry, or Secretaries of State, consisting of nine members, are responsible to the Chambers for the political conduct of the government, while the President is responsible only in case of high treason.

Besides these officers, there is a Council of State presided over by the Minister of Justice, whose function it is to advise on all subjects of law and administrative regulations submitted to it, its decision being final on causes or complaints against officers of the Government.

France is divided into 87 departments, which are subdivided into 362 "arrondissements," 2865 "cantons," and about 36,000 "communes." The President of the Republic appoints a prefect or administrative officer for each department, who is head of the police, issues local decrees, superintends tax collection, and, in a word, represents the government as general agent, assisted by a council elected by the people.

Public debt is divided into funded debt, which is not subject to re-imbursement, but only to interest payment, and floating debt or deposits with the treasury, and bills of exchange called "bons du trésor." The funded debt, represented by 5 per cent. Rentes, was \$4,750,337,109, and the floating debt, \$85,000,000.

Revenue for 1879, \$551,000,000; expenditure, \$547,800,000.

Imports in 1880 amounted to \$981,509,400, and exports the same year to \$680,129,800. Miles of railway, January 1, 1879, 15,265.

The large revenues are derived chiefly from excise and stamp taxes, only the insignificant sum of \$54,000,000, or about 10 per cent. of the whole revenue, coming from customs; the land tax or "contribution foncière," is assessed on the net revenue of lands and houses; the poll-tax, the door and window tax, and the license tax bring in large sums; the income tax is 3 per cent. on income from public funds or any other dividends, besides which the stamp taxes amount to 3 or 4 per cent. on this class of property; the excise brings in the largest revenue of all, about \$200,000,000 per annum, and is levied on spirits, tobacco, salt, sugar, paper, matches, coaches, railways, bridges, receipts, etc.

The army, consisting of about 503,000 men in time of peace, and 19,057 officers, costs about \$115,000,000 per annum. Every Frenchman of 20 years owes to the country five years active service, with very slight exemptions.

The French navy has 258 vessels, 1758 officers, and about 50,000 marines.

The Roman Catholic Church is the most powerful in France, and the sums paid to the clergy of that faith by the government amount to about \$8,000,000 a year.

Systematic provision is made for public instruction, every commune having to maintain primary schools, though education is neither gratuitous nor compulsory. In 1873, out of a population of 23,294,554 above twenty years, 7,702,362 could neither read nor write.

About half the French people are engaged in agriculture, and the multitude of small landed proprietors is greater proportionally than in any country except the United States; out of 18,513,325 rural population there were 9,000,000 land owners living on their lands, 4,570,000 farmers and tenants, and only 3,255,000 day laborers. The value of land under tillage varied from \$105 to \$323 per acre, and the rent of land from \$3.64 to \$12.14 per acre.

Germany.

The empire of Germany, (208,624 square miles; population, 1880, 45,194,172,) succeeded in 1871, to the North German Confederation of 1866. It is a Union of 25 sovereign states, consisting of 4 kingdoms, 6 grand duchies, 5 duchies, 7 principalities, and three free towns. Alsace-Lorraine, ceded by France at the close of the war of 1870-71, forms a 26th member of the confederation, but is governed by Imperial authority.

Germany is a constitutional monarchy, the Emperor exercising imperial power in the name of the 25 confederated states. The Bundesrath, or federal council, has 59 members appointed for each session by the governments of the several states. The Reichstag, or House of Representatives, has 397 members, elected for 3 years by universal suffrage—every German of 21 years being an elector. The sessions of the legislature are annual, and every law must receive a majority of the whole number of members of both Houses, and the sanction of the Emperor.

The revenue for fiscal year ending March 31, 1881, was \$148,239,138, derived one-half from customs, one-third excise on sugar, salt, tobacco, spirits and malt, and the remaining quota from various sources. The expenditure for ordinary purposes was \$147,695,846, of which no less than \$90,600,000 was for the army, and \$20,000,000 extraordinary expenses. The deficiency in revenue to meet expenditure was made up by contributions of the states, \$26,000,000, and loans \$12,000,000. In 1879, heavy additions were made to the tariff on imported goods, and Germany has returned to an extreme protective system.

The public debt is only about \$44,000,000 funded, and about \$40,000,000 floating debt, represented by Treasury notes bearing no interest.

An exclusive gold currency was adopted by law of December 4, 1871.

The German army on a peace footing has been fixed at 445,462 men until December 31, 1882. Military service is compulsory upon every German capable of bearing arms. The German navy consists of 86 vessels, 965 officers and 15,000 men.

Public school education is compulsory in Germany; the number of primary schools is about 60,000, and of pupils, 6,500,000. There are 360 gymnasia for preparatory training for the universities; of the latter, there are 21, with 1,913 professors, and 20,826 students.

The population of Germany in 1875 embraced about 27,000,000 Protestants, 15,000,000 Roman Catholics, and 500,000 Jews.

The foreign commerce of Germany amounted in 1880 to \$973,200,000 imports, \$705,375,000 exports.

Germany had in 1879, 19,840 miles of railway, about 11,000 miles of which were worked by the government, and 7,689 miles only were private railways.

In 1878 there were 33,660 miles of telegraph lines, sending 14 million messages. The postal and telegraphic departments are managed conjointly by the government, and have increased greatly of late years, the number of letters carried in 1877, being 604 millions, against 352 millions in 1872.

Great Britain.

Great Britain, a kingdom embracing England, Wales, Scotland, Ireland, and the Channel Islands, area 121,571 square miles, population 1881, 35,246,638, has also immense landed possessions in all parts of the globe; its colonies in Asia, chiefly British India, embrace over 250,000,000 inhabitants, in America over 5,000,000, and in Australia 2,700,000. By the British constitution the supreme legislative power is in a Parliament which holds for seven years unless sooner dissolved by royal proclamation. The house of Lords (537 members in 1880) consists of 5 peers of the Queen's family, 2 archbishops and 24 bishops, 201 dukes, marquises, earls, and viscounts, 261 barons, 16 Scottish and 28 Irish representative peers; all of these but the last named hold for life. The house of Commons consists of 658 members elected by limited suffrage, of whom 40 constitute a quorum to do business; members of Parliament receive no salary.

The executive government, nominally in the Crown, is practically in the Cabinet, consisting of 13 members whose tenure of office is dependent upon their measures commanding a majority in the House of Commons.

At the head of the Cabinet is the First Lord of the treasury, known as the Premier or Prime Minister; he dispenses the patronage of the Crown, his colleagues being appointed at his recommendation.

Revenue of Great Britain fiscal year ending March 31, 1881, \$420,207,440; expenditure, \$415,509,820; of which no less than 140 millions was for army and navy, and 150 millions more for interest; public debt 1880, \$3,843,518,460. Imports 1880, \$2,066,147,825; exports \$1,432,072,330.

The army in 1881 embraced 131,636 men, and 7,199 officers, besides 136,778 militia and 102,810 volunteers, maintained at a total cost of \$74,826,500. The navy consists of 238 vessels, maintained at a cost of \$51,607,975 in 1880.

The Great Britain is a net work of railways, of which there were 17,945 miles in operation in 1880. The telegraph embraced 5,375 miles, owned and operated by the

government since 1871. The post-office service of England, carried to a greater perfection than in any other country, delivered 1176 million letters in 1880, besides 123 million postal cards, and 382 million newspapers and book packets.

Education is widely extended; the total expenditure for elementary schools having been nearly \$20,000,000 in 1880.

England abounds in iron and coal mines, the product of pig iron amounting to about 350,000,000 per annum and of coal about \$230,000,000. Textile industries are of enormous extent, employing nearly 1 million hands; the metal manufactures come next employing 650,000 hands. British manufactures are found in all parts of the globe.

Agriculture is carried to a high degree of perfection, though the soil is in the hands of a comparatively small number of proprietors.

Great Britain is a Protestant country, the established church in England being the Episcopal, and in Scotland, Presbyterian, while in Ireland no church is now established by law. Since the abolition of the corn laws or duties upon grain in 1846, England has gradually become a free trade country, only about twenty articles being charged with import duties.

Greece.

Greece, a kingdom of south-eastern Europe, area 20,018 square miles, population 1879, 1,679,775, is governed, since his election by the National Assembly in 1863, by George I., son of the King of Denmark. By the constitution of 1864, the legislative power resides in a parliament or single Chamber of 187 Deputies elected for 4 years by universal suffrage. The revenue in 1880 was \$8,759,000, $\frac{1}{2}$ derived from customs, and the expenditure \$18,765,000; the public debt was \$58,572,730 in 1880. Imports 1879, \$29,101,400, exports \$17,992,000, principally raisins, currants, and olive oil. The army consists of 12,118 men, capable of being increased to 200,000 in war. The navy has 11 steamers and 10 sailing vessels. The commercial marine numbered no less than 5,001 vessels. Greece has only $7\frac{1}{2}$ miles of railway, from Athens to the Piræus, and 1,540 miles of telegraph. Post-offices, 140; letters carried, 1876, 3,066,630; journals, 1,996,939.

Guatemala.

Guatemala, the most populous of the five central American republics, 44,800 square miles; population 1872, 1,197,054, of which 360,608 were whites and 830,146 Indians; revenue in 1877, \$4,505,523, one-third of which was from duties on imports; expenditures, \$4,428,298; public debt, \$3,877,384; imports in 1876, \$2,717,000; exports, \$3,918,912, 1878, principally coffee. The country has no railways, though one is commenced, traversing the republic from the Caribbean Sea to the Pacific; there are 1100 miles of telegraph operated by the government. Public instruction is cared for by the government; the army has 3200 men, but there is no navy. Capital, Guatemala, 40,000 inhabitants, finest city in Central America. The clerical government was overthrown by a revolution in 1871, and the executive now resides in a president and a cabinet of four ministers.

Guiana.

Guiana is a large territory in the north-east part of South America, bounded by the Atlantic, the Amazon and the Orinoco. The climate is hot, and the principal products are sugar, rum, and molasses, together with fine timber woods. British Guiana—36,000 square miles, with 248,110 inhabitants in 1879—is divided into Essequibo, Demerara, and Berbice; has a governor appointed by the British crown; capital, Georgetown; population, 36,562. Imports, 1879, \$10,325,225; exports, \$13,577,675.

French Guiana, area 48,000 square miles, population 1877, 36,760; capital, Cayenne, on the island of the same name, which is a French penal settlement.

Dutch Guiana, or Surinam, lies between British and French; area 45,000 square miles; population 68,255, four-fifths of whom are negroes; capital, Paramaribo.

Haiti.

Haiti is a republic of the West Indies, occupying the west end of the island, of which Santo Domingo forms the eastern or Spanish part. Area of the whole island 28,000 square miles; population of Haiti about 550,000, nine-tenths of whom are negroes, the rest chiefly mulattoes. The language in use is French, and the state religion Catholic. By the constitution of 1867 legislative power is in an assembly and a president, chosen for 4 years. The finances are in chronic disorder; the revenue for 1877 was \$4,194,998, three-fourths derived from duties on imports and exports; the expenditure was \$4,023,687; debt \$14,000,000. The army has 6828 men and the navy 2 steam corvettes, with 8 guns. In 1877 the imports were \$7,971,000, and the exports \$8,474,000, chiefly coffee, cotton, and cocoa.

Honduras.

Honduras, one of the five Central American republics—58,168 square miles, population 376,410—is governed by a president, a single minister, and an assembly of 37 representatives. Revenue for 1880 was \$969,854, one-third from customs and about one-third from monopolies, the expenditure reaching nearly the same amount. National debt \$1,578,609; interest mostly unpaid. The exports amount to about \$1,305,000. The army numbers about 1,500 men. One line of railway is in operation, about 90 miles long. There are nearly 1,000 miles of telegraph. Education is becoming a prominent interest, and the government established a national college in 1878.

Italy.

Italy, a kingdom of southern Europe; area 114,380 square miles, population 1881, 28,209,620, of whom 26,658,679 were Catholics. It is divided into 69 provinces. The government is a constitutional monarchy, with a senate of 270 members appointed for life, and a chamber of 508 deputies elected by general suffrage. Absolute freedom of the press prevails. The government supports education, which is compulsory and gratuitous, by annual subsidies of about \$3,500,000. Agriculture is the principal Italian interest, though the silk, cotton, woolen, and straw manufactures are becoming important. Italy abounds in populous cities, of which Naples, 450,804, is the largest, and Rome, the capital, has 303,383. Revenue in 1880, \$287,163,000; expenditure, \$283,340,500; public debt, \$2,042,000,000; imports 1880, \$244,165,023; exports, \$225,128,904, of which silk made \$56,000,000. Standing army, 736,502, militia 553,005; navy 66 vessels, with 339 guns. 5,191 miles of railway in 1879, and 14,391 miles of telegraph.

Japan.

Japan is an empire of eastern Asia, ruled by a mikado aided by a great council, and without a legislative body; area 146,613 square miles; population 1876, 34,338,404. Revenue 1880 \$59,246,439, four-fifths of which was from land tax; expenditures, \$59,176,439; public debt, \$363,725,677. The army comprised 36,777 men in 1878, and the navy 27 steam vessels, with 5,561 men. Imports 1879, \$32,964,632; exports, \$28,711,527, one-half of which was raw silk; nearly one-half the commerce of Japan is with Great Britain and her colonies. Railroads in operation, 220 miles; telegraphs, 1,791 miles; post-offices, 3744, transmitting in 1877, 22,812,938 letters. The paper money of Japan is at about 30 per cent discount.

Mexico.

Mexico, a republic of North America, on the southern boundary of the United States—area 741,598 square miles, population 1877, 9,389,461—is divided into 27 states, besides Lower California and the federal district, governed by a president elected for 4 years, a Senate of 56 members chosen for 6 years, and a House of Deputies of 331 members for 2 years. The chief justice of the Supreme Court, elected for 6 years, is ex-officio vice-president of the republic. Each state has its local constitution, with elective governors and legislatures. The national language is Spanish, and the Catholic religion predominates, though all are equally protected. Education is being rapidly extended, there being 4000 public schools. Railway communication, formerly confined to a line from Vera Cruz to the City of Mexico, 263 miles, is becoming more general. There are about 7000 miles of telegraph. The chief communication is by the highways between principal cities, on which many lines of stages are constantly plying. The country is rich in agriculture and mineral wealth, vast table-lands, varying from 3000 to 5000 feet in elevation, producing almost every variety of grain and vegetables, while in the warmer regions oranges and other tropical fruits grow profusely. Coffee and cotton are largely cultivated. The northern states of Mexico are full of vast herds of cattle and sheep. Manufactures are poorly developed, but commerce, though much impeded by political turbulence and restrictive laws, is on the increase. The imports amount to a mean annual value of \$29,000,000; and the exports \$31,000,000, more than one-third of which go to Great Britain; but the large increase of commerce springs mainly from smuggling, which is directly fostered by exorbitant duties on imports, practically amounting to prohibition. The country being almost destitute of navigable rivers, the rates of carriage are enormous, and must so continue until the country can be traversed with competing lines of railway.

The revenue for the fiscal year 1880 was \$17,811,125, of which \$12,500,000 was from customs duties; the expenditure was \$23,128,218, more than one-third of which was for the army. The public debt is variously stated at from \$144,700,000 to \$395,500,000; but the Mexican Government claims that its European debt is annulled by the part taken by England, France and Spain in imposing the Maximilian dynasty upon the republic in 1861-62.

The army comprises 24,830 men, the navy only 4 insignificant gunboats.

Capital, Mexico, built in 1521, on Lake Tezcoco, 7435 feet above the sea level; population about 250,000.

Netherlands.

Netherlands, a kingdom of western Europe; area, 12,727 square miles; population 1880, 4,060,580 (by census,) nearly all natives of Holland. Revenue 1881, \$42,044,240; expenditure, 49,786,774; public debt 1879, \$376,908,500. Army in 1880, 65,113 men; navy 1880, 115 vessels, 503 guns, and 5197 men. Imports 1876, \$338,680,000; exports, \$232,680,000. Railways in 1879, 1390 miles, more than half managed by the State; telegraphs, 2196 miles. Postoffices, 1299; letters carried in 1877, 61,720,679; journals, 30,723,619.

Nicaragua.

Nicaragua, one of the five republics of Central America—area, 58,000 square miles; population, 300,000 (estimated), one-half of whom are Indians—is in large part covered with great forests, furnishing the finest mahogany, rosewood, and dye-woods. The

country has long been distracted by internal dissensions; it is governed by a president elected for 4 years, a cabinet of 4 ministers, a senate of 10 members, and an assembly of 11 representatives. The revenue amounted in 1880 to \$2,436,893, and the expenditure rather more, chiefly for the army and public debt of \$1,500,000. The exports amounted to \$2,057,822, and the imports to \$1,473,114. The principal exports were coffee, elastic gum, and gold and silver bullion.

Paraguay.

Paraguay, an inland republic of South America—area 91,987 square miles, population in 1876, 291,844—is a country without cities and almost without civilization. The language spoken is chiefly that of the Indians mixed with a little Spanish. The country achieved independence in 1811, and was ruled by the dictator, Dr. Francia, for 29 years, during which no foreigners were allowed to enter or leave Paraguay. Since 1870 the government, though nominally republican, has been under the control of Brazil. The country is hopelessly insolvent, owing \$236,000,000 to Brazil and the other allies as a legacy of the war, \$9,001,000 to Great Britain, and \$2,101,000 domestic debt, amounting altogether to more than the total value of the country, real and personal. Revenue in 1876, \$215,567; expenses, \$224,630, besides interest and army. The imports in 1880, \$1,030,000, and the exports \$1,161,900. The army embraces 2,000 men, mostly now discharged to relieve the treasury of expense. The only railway in Paraguay is one of 45 miles, and the only telegraph is of the same length.

Peru.

Peru, a republic on the western coast of South America, (area 432,297 square miles; population in 1876, 3,050,000) is governed, under a constitution adopted in 1838, by a President chosen for 4 years, a Senate of 44, and a House of Representatives of 110 members. The revenue for 1877 was \$38,900,000, about one-ninth of which was from customs, the expenditures \$51,600,000; the public debt was \$281,940,684, the interest on the foreign debt being in default. The revenue is chiefly derived from the sale of guano and nitrate of soda. The importations of 1879 were \$27,000,000, and the exports \$45,000,000. The premium on specie is 62 per cent., and the domestic debt sells at 50 cents on the dollar.

The army consists of 4,670 men, besides 1,000 gendarmes and 1,200 vigilantes; during the war with Chili, lasting from 1879 to 1881, Peru put about 16,000 men in the field; the navy consisted of 18 steam vessels, well armed and equipped, of 3,396 horse power, and 66 guns, among which were seven ironclads and rams which were captured by the Chilians. The merchant marine in 1876 had 147 sailing ships and 8 steamers. In 1879 there were 1,750 completed miles of railway and 600 more in construction, Peru having gone into the most extensive railroad building in proportion to its inhabitants of any country. Silver is largely mined, the annual product being from 3 to 4 million dollars, and coinage is free and unlimited. Peru has a fertile soil, producing cotton, sugar, grapes, and olives, while the forests abound in the cinchona-tree, which yields the precious Peruvian bark, or quinine.

Capital, Lima; population in 1876, 101,488.

Portugal.

Portugal, a kingdom of Western Europe; area, 34,595 square miles; population 1879, 4,348,551. The legislative power is in a Cortes with a Chamber of 100 peers, appointed for life by the king, and a Chamber of Deputies 149, elected by the people. Revenue 1880, \$30,794,004; expenditure, \$34,478,143; public debt 1880, \$387,659,575. Imports in 1880, \$34,046,000; exports, \$20,520,000. Army, 1880, 31,874; navy, 44 vessels, with 156 guns and 3,470 men. Railways in 1879, 751 miles; telegraphs, 2,300 miles. Post-offices, 616; letters carried, 10,470,152; journals, 6,021,744 in 1878.

Russia.

Russia, an empire of Eastern Europe and Western Asia; total area, 8,138,541 square miles; population, 82,330,864. Revenue, 1877, \$435,548,000; expenditure, \$469,121,794; public debt, 1880, \$2,081,417,932, since which loans and paper to the amount of \$340,000,000 have been issued. The cost of the war in 1877-78 with Turkey and her allies was stated officially in June, 1878, at 1,060 millions. The army in 1881 embraced 974,771 men; navy 389 men of-war, with 561 guns. Imports, 1880, \$395,450,000; exports, \$418,466,000. Railways in 1879, 16,715; telegraphs, 42,595 miles. Post-offices, 3,678; letters carried, 90,704,555; postal cards 2,494,006, journals, 81,130,872 in 1877. Amount of paper money, (irredeemable,) was in 1879, 850 millions, which is depreciated about 30 per cent.

Salvador.

Salvador, (sometimes called San Salvador, the name of its capital city,) is the smallest of the five Central American republics; area, 7,226 square miles; population in 1878, 482,422. It is governed by a President elected for four years, a ministry of five members, and a Congress of 12 Senators and 24 Deputies, elected for 2 years. Suffrage is universal, except for servants and persons without legal occupation. Education, though

not general, is in advance of other Central American States; the Roman Catholic religion is recognized, but others protected. The army has 1,000 men. Revenue, 1880, \$3,272,740; expenditure, \$3,122,063; national debt, \$2,078,885; imports in 1880, \$22,204,512; exports, \$4,583,638, nearly one-half of which was indigo, and one-third coffee. About one-half the commerce of Salvador is with Great Britain.

Santo Domingo.

Santo Domingo, a republic of the West Indies, forms the larger portion of the island of Haiti, lying east of the republic of that name; area, 20,591 square miles; population in 1876, 250,000 (estimated,) principally mixed Spaniards, Indians and negroes. The national language is Spanish, and the established religion Roman Catholic. The government is vested in a President elected for six years, who appoints a Council of 4 ministers, a Senate of 9 members also chosen for six years, and a House of 15 members. Revenue in 1876, \$853,254; expenditure, \$740,428; foreign debt contracted in London in 1869, \$3,780,000, which was repudiated in 1872. Imports, \$1,745,654; exports, \$1,546,809, chiefly tobacco and sugar. The soil is of extraordinary fertility, the climate soft and inviting, and much more salubrious than any other part of the West Indies. Civilization is extremely backward, and public education neglected. There are literally no good roads on the island, transportation being almost wholly on the backs of horses and mules. The army consists of 4,000 men, and the navy of 5 small vessels, with 44 guns. The capital, Santo Domingo, has about 6,000 inhabitants.

Spain.

Spain, a kingdom of Western Europe; area, 193,171 square miles; population 1877, 16,333,293. The legislative power is in the Cortes, a Senate, and a Chamber of Deputies elected for 5 years by indirect suffrage. Revenue, 1880, \$163,347,097; expenditure, \$156,529,840; public debt, 1880, \$2,504,571,684; imports, 1880, \$88,660,000; exports, \$100,980,000; army in peace, 90,000 men; navy, 139 vessels and 552 guns. Railways, 1879, 4,203 miles; telegraphs, 8,190 miles; Post-offices, 2,358; letters carried, 1874, 80,632,911.

Sweden and Norway.

Sweden and Norway, a kingdom of Northwestern Europe, united under one dynasty. Sweden, 170,927 square miles; population, 1878, 4,531,863; revenue, \$20,503,260; expenditure, \$20,093,260; public debt, 1880, \$62,196,184; army, 41,280 men; navy, 42 steamers and 97 small vessels, with 218 guns. Imports, 1880, \$62,139,340; exports, \$50,264,280. Nearly one-half the commerce is with Great Britain. Railways, 3,325 miles, one-third operated by the State; telegraphs, 4,968 miles; post-offices, 1,883; letters in 1876, 27,044,869.

Norway, 122,823 square miles; population, 1876, 1,806,900. Revenue, 1881, \$13,454,670; expenditure, \$11,937,340; public debt, 1881, \$24,705,000; imports, 1880, \$40,715,976; exports, \$29,359,530; army, 13,750 men; navy in 1881, 29 steamers and 88 small vessels, with 154 guns. Railways, 501 miles; telegraphs, 5,110 miles, nearly all operated by the government. Post-offices in 1877, 870; letters carried, 12,121,044; journals, 5,547,498.

Switzerland.

Switzerland, a republic of Central Europe; area, 15,908 square miles; population, 1880, 2,831,787, (census.) By the federal constitution of 1874, the legislative body consists of a national council of 135, elected for three years; a council of 44 members, one for each canton. The executive power is in a federal council, chosen for three years by the federal assembly, and in a President of the Swiss Confederation, elected for one year from its own members, by the federal council. Revenue, 1880, \$8,502,901; expenditure, \$8,020,764; debt, \$6,120,780. Army, (all men between 22 and 32,) 119,440, besides the Landwehr, comprising all between 33 and 44, 91,595 in 1880. The commerce of Switzerland is not officially reported in money values. Railways, 1560 miles; telegraphs, 4,020 miles. Post-offices, 799; letters carried, 65,374,446; journals, 48,137,245.

Turkey.

Turkey, a monarchy of Southeastern Europe and Western Asia; area, 935,110 square miles; population in Europe, 8,866,500; in Asia, 16,629,980 (estimated) in 1879. The government is a constitutional monarchy since 1876, the Sultan being the irresponsible sovereign, convoking and dissolving the General Assembly at his pleasure. The ministers are responsible to the Chamber of Deputies; the senate are nominated for life by the Sultan, and the deputies elected by secret ballot, one to every 150,000 males.

The financial affairs of Turkey after the long war are greatly involved, the revenue being less than \$63,000,000, and the expenditures exceeding \$125,000,000. Public debt amounted in 1880 to \$1,289,565,000. No official statistics regarding commerce exist. Imports are estimated at \$107,000,000, and exports at \$99,000,000 annually. Army (compulsory service for 20 years), 350,000 men in time of peace; navy, 116 steam vessels, 50 sail vessels, and 1600 guns. Railways, 949 miles; telegraphs, 15,640 miles.

Uruguay.

Uruguay, a republic of South America—area, 72,151 square miles, population, 1877, 447,000 (estimated)—is governed by a President, a ministry of 4 cabinet officers, and a legislature composed of 13 Senators and 40 Representatives. The revenue in 1879 was \$8,936,714, three-fourths of which was from customs duties; the expenditures \$10,090,260, nearly half of which was for the army and navy. The public debt in 1879 was \$47,861,042; paper money to the amount of \$6,000,000 was no longer current in commerce, though received by the government. Payment of interest on the debt has been lately resumed.

The imports in 1879 were \$18,328,225, and the exports \$19,752,201—1879.

The army consists of 2,261 men. 275 miles of railway are in operation, and 730 miles of telegraph. There are 144 post-offices; letters mailed in 1877, 1,082,876. Capital, Montevideo; population, 1877, 91,167. About half the property of the republic belongs to foreigners, principally Spaniards, Italians, and Brazilians.

Venezuela.

Venezuela (United States of), a republic formed after the dissolution of the old republic of Colombia, dates from the constitution of 1864. It has 439,119 square miles, and 1,784,197 inhabitants in 1873. The confederation consists of 20 States, besides the federal district, each having its own distinct government, and electing delegates to the Congress, which meets annually at Caracas, the capital city, of 48,997 inhabitants. The President is elected for two years.

The revenue for 1879 was \$4,680,000, four-fifths of which came from customs and tonnage duties; the expenditure, \$4,448,000. The public debt in 1879 was \$67,309,990, payment of interest on which was resumed in 1875. The imports were \$14,800,000 in 1876, and the exports \$11,300,000, chiefly coffee and cocoa. The only railway, 70 miles long, was opened in 1877. The army consists of 2,240 men.

* The figures before the names of the Associate Justices indicate the order of their appointment. The numbers following refer to the same numbers in the first column, and show the vacancy filled by each appointment.

† Resigned.

‡ Presided one term of the Court; appointment not confirmed by the Senate.

§ The Supreme Court, at its first session in 1790, consisted of a Chief-Justice and five Associates. The number of Associate-Justices was increased to six in 1807 by the appointment of Thomas Todd; increased to eight in 1837 by the appointments of John Catron and John McKinley; increased to nine in 1863 by the appointment of Stephen J. Field; decreased to eight on the death of John Catron in 1865; decreased to seven on the death of James M. Wayne, in 1867; and again increased to eight in 1870.

NOTE.—To determine the years covered by a given Congress, double the number of the Congress, and add the product to 1789; the result will be the year in which the Congress closed. Thus, the 35th Congress = $70 + 1789 = 1859$, that being the year which terminated the 35th Congress, on the 4th of March. To find the number of a Congress sitting in any given year, subtract 1789 from the year; if the result is an even number, half that number will give the Congress, of which the year in question will be the closing year. If the result is an odd number, add one to it, and half the result will give the Congress, of which the year in question will be the first year.

PRODUCTION AND CONSUMPTION OF BEER.

The following table, (from the British Trade Journal, except as to the United States,) gives the quantity of beer, (including ale,) brewed in various countries in 1880, with the consumption *per capita* of population. As no account is taken of the quantity imported into or exported from each country in these figures, it is to be presumed that this element would modify the result as to certain countries.

	Number of Breweries.	Quantity Brewed.	Con- sump- tion per head.		Number of Brew- eries.	Quantity Brewed.	Con- sump- tion per head.
		Gallons.	Gallons.			Gallons.	Gallons

NOTE.—The salaries of Internal Revenue Collectors are graduated annually in proportion to the amount of revenue collected by each—the maximum salary being limited to \$4,500 by law.

The numbers of the collection districts are those retained when the districts in various States were consolidated by law, and those bearing the intervening numbers were abolished.

NOTE.—While some collectors have fixed salaries, other officers are paid, in whole or in part, by fees or commissions, to which the law fixes a maximum limit.

UNITED STATES CONSULAR SERVICE.

The following table includes all consuls, consuls-general, and commercial agents of the United States, the amount of whose compensation reaches \$1,000, or upwards, annually. By the act of June 1st, 1874, the salaried consulates are divided into seven classes, besides other subdivisions, with specific fixed salaries for each, as follows:

Five consulates at.....	\$6,000	Twenty-one consulates at.....	\$3,000
Two " at.....	5,000	Sixteen " at.....	2,500
One consulate at.....	4,500	Thirty-seven " at.....	2,000
Six consulates at.....	4,000	Forty-seven " at.....	1,500
Eight " at.....	3,500	Twenty " at.....	1,000

By law, all consuls receiving a fixed salary are required to pay into the Treasury, without reduction, all fees received by virtue of their offices. At other consulates and consular agencies the fees collected form the sole compensation of the incumbent, which, however, is limited in the case of consular agents to a maximum of \$1,000, and such agents are usually allowed to transact business. The compensation of the feed consuls is limited to \$2,500. If the fees exceed that sum, such consuls can pay clerk-hire from the fees received at the consulate when specially authorized, but not otherwise. The column of fees shows the amount of fees received at each consulate and agency from which returns have been made for the fiscal year ending June 30, 1880.

Corrected at the Department of State, January, 1882.

*The maximum pay of colonels is limited to \$4,500, and lieutenant-colonels to \$4,000.

The law provides for the retirement from active service of any commissioned officer who has served 30 years as such, on his own application, at the discretion of the President; or for placing on the retired list, unconditionally, after 40 years service, any officer applying to be retired: or, if 45 years of actual service, or 62 years of age is reached, an officer may be retired at the discretion of the President.

The number of officers on the retired list is limited to 400 by law. The pay is fixed at 75 per cent. of the pay allotted to the rank of officers in active service at the time of retirement.

QUARTERS, FUEL AND FORAGE ALLOWED TO ARMY OFFICERS.

By Act of June 18, 1878, all allowance or commutation for fuel was prohibited, but wood is furnished at \$3 per cord, out of the pay of officers. Forage is furnished only in kind, and only to officers actually in the field or west of the Mississippi, on the basis of five horses for the General of the Army, four for the Lieutenant-General, three each for a major or a brigadier-general, and two each for a colonel, lieutenant-colonel, major, mounted captain or lieutenant, adjutant and regimental quartermaster. Quarters are furnished on the following basis: General, (commutation for quarters,) \$125 per month; Lieutenant-General, \$100 per month; major-general, six rooms; brigadier-general or colonel, five rooms; lieutenant-colonel or major, four rooms; captain or chaplain, three rooms; and first or second lieutenant, two rooms—all of which may be commuted at \$10 per room per month.

NOTE.—The law provides that no allowances shall be made to officers in addition to their pay, except quarters and forage furnished in kind.

Mileage at the rate of eight cents per mile is allowed for travel under orders.

The pay of cadets at the U. S. Military Academy, West Point, was fixed at \$540 per annum, by Act of Aug. 7th, 1876, instead of \$500 and one ration *per diem*, (equivalent to \$609.50) by former laws.

The pay of private soldiers runs from \$156, (\$13 a month and rations,) for first two years, to \$21 a month and rations, after twenty years service,

The following is a list of generals who have commanded the army since 1775, with the dates of command as far as can be ascertained from the official records :

Major-General George Washington, June 15, 1775, to December 23, 1783.

UNITED STATES MILITARY ACADEMY.

The United States Military Academy at West Point was founded by act of March 16, 1802, constituting the corps of engineers of the army a military academy with fifty students or cadets, who were to receive instruction under the senior engineer officer as superintendent. Later acts established professorships of mathematics, engineering, philosophy, etc., and made the academy a military body, subject to the rules and articles of war. In 1815, a permanent superintendent was appointed, and a year later an annual board of visitors was provided for, to be named by the President, the Speaker of the House, and the President of the Senate. In 1843 the present system of the appointment of cadets was instituted, which assigns one cadet to each Congressional district and Territory in the Union, to be named by the Representative in Congress for the time being, and ten appointments at large, specially conferred by the President of the United States. The number of students is thus limited to 312. A large proportion of those appointed fail to pass the examination, and many others to complete the course, the proportion being stated at fully one-half hitherto. The course of instruction requires four years, and is largely mathematical and professional. The discipline is very strict, even more so than in the army, and the enforcement of penalties for offences is inflexible rather than severe. The whole number of graduates from 1802 to 1877 was about 2,200, of whom 1,200 are deceased and about 1,500 living. Of those surviving, 800 are still in the army, and about 700 out of service.

Appointees to the Military Academy must be between 17 and 23 years of age, at least five feet in height, and free from infirmity, and able to pass a careful examination in various branches of knowledge. Each cadet admitted must bind himself to serve the United States eight years from the time of admission to the academy. The pay of cadets, formerly fifty dollars per month and rations, was fixed at \$540 per year, with no allowance for rations, by the act of 1876. The aggregate amount of money appropriated by the United States for the Military Academy from 1802 to 1877 inclusive, was \$11,396,128, being an average of about \$149,949 annually. The number of actual members of the academy, by the official register of June, 1881, was 192.

THE NAVY OF THE UNITED STATES.

Condensed from the Navy Register for 1881, and the Annual Report of the Secretary of the Navy, December, 1881.

There were in the service in 1881, 65 naval steam vessels, all screw propellers except six, besides 23 wooden sailing vessels, 24 iron-clad vessels, two torpedo boats and 25 tugs. Total 139, of which about 57 were in efficient service. The number of guns is 1,033.

The active list of the navy is composed of 1 admiral, 1 vice-admiral, 12 rear-admirals, 25 commodores, 50 captains, 90 commanders, 80 lieutenant-commanders, 280 lieutenants, 100 masters, 100 ensigns, 82 midshipmen, 130 cadet-midshipmen, and 142 cadet-midshipmen on probation at the Naval Academy, all of whom are officers of the line.

Of the staff there are 1 surgeon-general, 15 medical directors, 14 medical inspectors, 50 surgeons, 79 passed assistant surgeons, 10 assistant surgeons, 1 paymaster-general, 12 pay directors, 12 pay inspectors, 49 paymasters, 29 passed assistant paymasters, 19 assistant paymasters, 1 engineer-in-chief, 69 chief engineers, 100 passed assistant engineers, 35 assistant engineers, 73 cadet engineers, and 79 cadet engineers on probation at the Naval Academy; 24 chaplains, 12 professors of mathematics, 1 secretary for the admiral, and 1 for the vice-admiral; 1 chief constructor, 10 naval constructors, 5 assistant constructors, and 10 civil engineers.

The warrant officers consist of 51 boatswains, 55 gunners, 53 carpenters, 42 sailmakers, and 41 mates.

The retired list is composed of officers of the line as follows: 42 rear-admirals, 20 commodores, 12 captains, 10 commanders, 15 lieutenant-commanders, 8 lieutenants, 11 masters, 5 ensigns, 2 midshipmen. Staff officers, viz.: 22 medical directors, 1 medical inspector, 2 surgeons, 5 passed assistant surgeons, 7 assistant surgeons, 9 pay directors, 2 pay inspectors, 3 paymasters, 2 passed assistant paymasters, 1 assistant paymaster, 19 chief engineers, 19 passed assistant engineers, 24 assistant engineers, 3 naval constructors, 8 chaplains, 7 professors of mathematics, 10 boatswains, 5 gunners, 13 carpenters, and 10 sailmakers.

The active list is therefore composed of 1,103 officers of the line, 693 officers of the staff, and 242 warrant officers—total 2,038 officers of all grades.

The retired list is composed of 125 officers of the line, 117 officers of the staff, 38 warrant officers, and 6 professors of mathematics.

There were, July, 1881, in the service, provided for by the Navy Appropriation Act for the fiscal year 1882, 7,500 enlisted men and boys.

The Marine Corps consists of 77 officers and 1,500 enlisted men.

THE UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

The United States Naval Academy was opened October 10, 1845, and the credit of its foundation is attributed to Hon. George Bancroft, then Secretary of the Navy under President Polk. The course of instruction, designed to train midshipmen for the navy, at first occupied five years, of which three were passed at sea. Various changes have been made in the course of instruction, which was made seven years in 1850, four years in 1851, and six years (the two last of which are spent at sea) March 3, 1873, where it now remains. The Naval Academy, first located at Annapolis, Maryland, was removed to Newport, R. I., in May, 1861, but reestablished at Annapolis in September, 1865, where it now is, occupying lands formerly known as Fort Severn. The academy is under the direct care and supervision of the Navy Department. There are to be allowed in the academy one cadet-midshipman for every member or delegate in the House of Representatives, appointed at his nomination, one for the District of Columbia, and ten appointed at large by the President. The number of appointments which can be made is limited by law to twenty-five each year, named by the Secretary of the Navy after competitive examinations, the cadets being from fourteen to eighteen years of age. The successful candidates become students of the academy, and receive the pay of cadet-midshipmen, \$500 per annum. Besides the cadet-midshipmen, 25 cadet-engineers may be appointed each year, from 16 to 20 years of age, on competitive examination involving a higher standard of knowledge. The course for cadet-engineers is 4 years at the academy and 2 additional years at sea. All cadets who graduate are appointed assistant engineers in the navy as fast as vacancies occur. The course of instruction is thorough, involving a close pursuit of mathematics, steam engineering, physics, mechanics, seamanship, ordnance, history, law, etc. The whole number of students in 1881 was: Cadet-midshipmen, 161; cadet-engineers, 100; total, 261. The graduating classes of 1881 numbered 72 cadet-midshipmen, and 24 cadet-engineers.

Amount of State Debt, Oct. 1, 1880: Funded, \$2,813,500; unfunded, \$2,232,905, (being amount of interest due on foregoing bonded debt;) total, \$5,096,405.

General Statement of State Bonds issued: \$22,000 thirty year State Bank, 5 per cent.; \$810,000 thirty year State Bank, 6 per cent.; \$530,000 thirty year Real Estate Bank, 6 per cent.; \$810,000 thirty year Funding, 1869, 6 per cent.; \$625,000 thirty year Funding, 1870, 6 per cent.; Ten per cent. Bonds of 1874, ten years, \$261,500; Six per cent. Funding Bonds of 1874 and 1875, \$412,000.

NOTE.—The above is exclusive of \$1,986,773 Levee Bonds, \$5,350,000 Railroad Aid Bonds, and of \$3,694,644 other disputed debt. The Supreme Court of Arkansas in 1878 decided that all the Levee bonds are unconstitutional and invalid. All of the Railroad Aid bonds have been declared by the Supreme Court to have been illegally issued. Amendment to the State Constitution, virtually repudiating a large part of the State debt, was defeated at the election of Nov. 2, 1880, by vote of 64,497 in its favor, to 41,049 against it. As it required a full majority of all votes cast at an election to amend the Constitution, and there were 132,985 votes cast, it lacked 3,991 votes of a majority.

State Receipts for year ending Sept. 30, 1879, \$613,957.

State Expenditures for year, \$550,196.

Amount raised by Taxation, \$613,957.

JUDICIARY, SUPREME COURT.—Jos. P. Comegys, *Chief-Justice*; L. E. Wales, John W. Houston, Edw. Wootton, *Associate Justices*; Willard Saulsbury, *Chancellor*. Term, for life. Appointed by Governor. Salary, *Chief-Justice* and *Chancellor*, \$2,500 each; *Associate Justices*, \$2,000. Clerk, John D. Burton.

Amount of State Debt, July 1st, 1881, \$715,000, all funded.

The State holds interest-paying securities (railroad, etc.) to the amount of \$1,120,799, and is virtually out of debt. The annual receipts were about \$155,000, and the annual expenditures \$105,000, at the date of the last Governor's message. Of the tax receipts, no less than \$40,590 was from licenses, \$33,812 from tax on railroads and passengers, and only \$30,956 from taxes on real and personal property, in the whole State. It results that Delaware is the least taxed community in the Union, so far as the expenses of State government are concerned.

JUDICIARY, SUPREME COURT.—*Chief-Justice*, Pinkney H. Walker; *Associate Justices*, Alfred M. Craig, John Scholfield, T. Lyle Dickey, John M. Scott, John H. Mulkey, Benj. R. Sheldon. Term 9 years each. Elected by the people. Salary, \$5,000 each.

Illinois has no State debt. State Receipts for two years ending Oct. 1, 1880, \$5,040,297.09.

State Expenditures for two years, \$6,365,344.73. Amount raised by taxation, \$2,140,000.

Amount of taxable property as assessed—real, \$623,979,369; personal, \$175,834,197: Total, \$799,813,566. Rate of State tax, 48 cents on \$100.

The State taxation forms but a small part of the aggregate amount raised by tax. The County taxes were about \$6,000,000; City taxes, \$7,000,000, and Town and District taxes, \$11,500,000.

The State constitution now prohibits cities or counties from subscribing to railroad or other corporations, and limits municipal debts to 5 per cent. on aggregate taxable property.

JUDICIARY. SUPREME COURT.—*Chief-Justice*, Robert S. Gould. *Associate Justices*, J. W. Stayton, M. H. Bonner. Term, 4 years. Elected by the people. Salary, \$3,500 each. Amount of State Debt, September 1, 1881, \$4,491,100, in State bonds, bearing 6 and 7 per cent. interest, except loan of April 21, 1874, which draws 10 per cent. interest.

State Receipts for year 1881, \$1,962,914.

State Expenditures for year, \$1,769,879.

Amount raised by Taxation, \$1,962,170.

Amount of Taxable Property as assessed, 1879: real and personal, \$303,202,424.

Rate of State Tax, 5 mills on each dollar.

In addition to the tax of one-half of one per cent. on property, there was levied a poll tax of \$2 on every male between 21 and 60 years, one-half of which, together with the fourth of the *ad valorem* tax, is expended for school purposes.

The State has further laid the foundation for an ample school fund, by devoting to that object all the alternate sections of land reserved out of its heavy railroad grants, and also one-half the public domain of the State, with all money that may come to the State from the sale of such moiety.

The public domain of Texas, (which alone of all the States retained control and ownership of its public lands upon admission to the Union,) still embraces more than 67,000,000 acres, or a territory larger than the entire surface of any State in the Union, except California and Nevada. The annual immigration into Texas is reckoned at 200,000 in the Governor's message for 1879. The aggregate vote at the State election of 1880 was 264,345.

West Virginia has no debt (unless the share of that State in the *ante-bellum* State debt of Virginia is reckoned such), the State Constitution having prohibited the creation of any debt by the Legislature, except in an emergency, like rebellion or invasion. After the admission of the State, in 1863, Virginia claimed that one-third of her State debt of \$45,000,000 should be paid by West Virginia, and left out \$15,239,871 in the adjustment of her debt. West Virginia claims that a very much smaller sum is her share, and the matter remains unadjusted.

NOTE.—In California, in 1880, five Democratic Electors for President and one Republican Elector were chosen: Judge Terry, one of the Democratic Electors at Large, running behind the ticket. The vote above given is on the Elector at Large of each party receiving the highest vote—i. e., Egerton, Republican (elected), and Wallace, Democrat. In 1880, the Greenback Electoral ticket received 3,392 votes, and there were 60 scattering.

In 1876, Cooper, Greenback Presidential Candidate, received 44 votes.

NOTE.—At the election of 1880, the State issue, represented in the above vote on Governor, was the payment of the State debt. The Democrats divided on two candidates, Wright, Debt-paying, in favor of payment in full, and Wilson, "Low tax" Democrat, in favor of scaling or indefinitely postponing the payment of the debt. The Republican candidate for Governor was elected through this division.

NOTE.—Numerous variations in the Presidential vote are found in the different tables published. One principal source of discrepancy is in taking the vote for different Electors, of either party, as representing the vote for President. As the votes for Electors vary greatly, some tables take the highest vote cast for any one Elector; others, the highest cast for any Elector-at-large; and others still, the average vote cast for all the Electors of each party.

1. In Louisiana, two Republican Electoral tickets were voted for: the regular Republican, and the Beattie, or Grant Republican. The latter received about 9,740 votes, not returned in the first table published.

2. In Maine, the Hancock Electoral ticket was styled "Fusion," containing 3 Democratic and 4 Greenback Electors. Besides this, a "Straight" Greenback Electoral ticket was voted for, with Weaver's name at the head.

3. The above vote in Nevada and Tennessee is from the State Officers. Other statements vary largely in the vote of both parties.

4. The footings in Texas are correct, as rendered to the Secretary of State, but three Counties made no return of votes for President, (Denton, Galveston and McMullen.) If these cast as many votes for Electors as for Governor, it would increase Hancock's vote in the State, 5,820, and Garfield's 1,746, and Weaver's 693.

5. These figures are the finally corrected returns in the Office of the Secretary of State. Earlier statements gave Garfield 45,567 votes, and Hancock 18,316 votes.

6. Two Democratic Electoral tickets were voted for in Virginia, the Regular or Debt-paying Hancock Ticket, and the Re-adjuster, or Mahone Hancock Ticket. Both are added together in the table.

7. Of the scattering votes, 10,805 were cast for Neal Dow, "Prohibition" candidate for President, and 767 votes for John W. Phelps, "American" or Anti-Secret-Society candidate.

8. The Electoral vote of Georgia was cast irregularly, on the 2d Wednesday of December, instead of the first Wednesday, as required by Act of Congress. In the count of the Electoral vote, Feb. 9, 1881, Congress declared Hancock to have received 158 votes, if Georgia were counted, and 144 votes, if not counted; that in either case, Garfield had received a majority of the votes, and was duly elected.

* Previous to the election of 1804 each elector voted for two candidates for President; the one receiving the highest number of votes, if a majority, was declared elected President; and the next highest Vice-President.

† Three States out of thirteen did not vote, viz.: New York, which had not passed an electoral law; and North Carolina and Rhode Island, which had not adopted the Constitution.

‡ There having been a tie vote, the choice devolved upon the House of Representatives. A choice was made on the 36th ballot, which was as follows: Jefferson—Georgia, Kentucky, Maryland, New Jersey, New York, North Carolina, Pennsylvania, Tennessee, Vermont, and Virginia—10 States; Burr—Connecticut, Massachusetts, New Hampshire, and Rhode Island—4 States; Blank—Delaware and South Carolina—2 States.

* Eleven States did not vote, viz.: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virginia.

† Three States did not vote, viz.: Mississippi, Texas, and Virginia.

‡ Three electoral votes of Georgia cast for Horace Greeley, and the votes of Arkansas, 6, and Louisiana, 3, cast for U. S. Grant, were rejected. If all had been included in the count, the electoral vote would have been 300 for U. S. Grant, and 66 for opposing candidates.

Per Cent. of Increase from 1870 to 1880:—

Total Population.....	30.08 per cent.	Colored Population.....	34.67 per cent.
White Population.....	29.20 " "	Chinese Population.....	66.73 " "

NOTE.—The inhabitants of Alaska and the Indian Territory (both unorganized as yet) are not included in the above total. The census of Alaska in 1880 showed: White, 392; Creoles (issue of intermarriages between the whites and natives), 1,683; Aleuts, 1,960; Inuits, 17,488; Indians, 8,655; total, 30,178.

The Indian Territory is estimated to contain 60,000 to 75,000 inhabitants.

The Indians included in the census in each State and Territory are those reckoned as civilized, or outside of tribal organizations. Indians not taxed are by law excluded from the census. Estimates of their numbers vary widely—from 200,000 to 350,000 (the latter as estimated in the census of 1870), while the latest census or estimate of the Indian agencies, as reported in 1881 to the Commissioner of Indian Affairs, gives 248,417 Indians, excluding Alaska. The whole population of the United States exceeds 50,500,000, including Indians and Alaska.

In the Chinese column (from want of space elsewhere) have been reckoned 148 Japanese.

POPULATION OF THE UNITED STATES IN 1870 AND 1880.

From the Official Returns of the Tenth Census, 1880.

NOTE.—In cases where counties are left blank, they have usually been consolidated with other counties, or have been organized since the date of the former census.

Population of the Principal Cities and Towns in the United States in 1870 and 1880; to which is added the Debt of each City as far as ascertained.

From the Tabulated Returns of the Tenth Census.

NOTE.—The population given for 1880 is in some cases subject to correction. The "net debt" of Cities is the aggregate funded and floating indebtedness, less amounts in sinking funds.

THE METRIC OR DECIMAL SYSTEM.

As applied to weights and measures, the metric system has been adopted by France, Germany, Italy, Spain, Portugal, Belgium, Netherlands, Greece, Mexico, Brazil, Peru, Chili, etc. Switzerland, Denmark, and Austria have partially adopted it, and it is legalized or permissive (not compulsory) in the United States and in Great Britain. As applied to measures of length, the standard unit is the metre, ascertained with mathematical exactness to be one ten-millionth part of a terrestrial meridian. The unit of volume (or litre) is the capacity of a cubical vessel measuring one tenth of a metre on its edges; and the unit of weight is the actual weight of distilled water which will fill such a vessel. The following tables exhibit the various designations of weights and measures under the metric system, and their equivalents in existing American or English weights and measures, as legalized by act of Congress, July 27, 1866.

MEASURES OF LENGTH.

* The whole quantity liable to be issued under the act of July 2, 1862, is 9,600,000 acres.

NOTE.—Under an act of Congress approved Sept. 4, 1841, each State thereafter admitted to the Union was granted 500,000 acres of land for purposes of internal improvement; 46,080 acres (72 sections) for a State University; 32,000 acres (50 sections) for the purpose of erecting public buildings at the Capital; and 32,000 acres for a penitentiary or State prison. The same grant of 500,000 acres was extended to the States of Alabama, Arkansas, Illinois, Indiana, Louisiana, Michigan, Mississippi, and Missouri. The quantity of land thus granted is estimated at 9,000,000 acres.

By act of July 2, 1862, each State, old or new, was granted 30,000 acres of the public domain for each Senator and Representative in Congress (or land scrip to that amount) for the purpose of endowing a College of Agriculture and the Mechanic Arts in each State. Of the 9,600,000 acres estimated to be due the States under this munificent land-grant, about 8,300,000 acres have already been located.

NUMBER OF ELECTORS IN FRANCE.

In the French Republic, suffrage is practically universal, there having been inscribed on the registers of the Ministry of the Interior by an official report dated April 1, 1876, 9,948,070 legal voters, out of a population the same year of 36,905,723 in France. This gives 1 voter to every 4 inhabitants, nearly. In the United States, by the census of 1870, the ratio of legal voters to population was 1 to $4\frac{1}{4}$, nearly. In Great Britain, where suffrage is restricted, the proportion is 1 voter to every 11 inhabitants.

BUSINESS OF THE SUEZ CANAL FROM ITS OPENING.

This great ship canal, one hundred miles in length, connects Suez on the Red Sea with Port Said on the Mediterranean. It was commenced by a company, aided by large subscriptions of the governments of Egypt, France, and England, in 1858, and opened November 17, 1869. It is 72 feet wide at the bottom, about 300 feet at the surface, and 26 feet in depth, easily passing the largest vessels. The controlling interest in the canal was purchased for £4,000,000, in 1875, by the British government, which now holds it. The following table exhibits the prodigious increase of business on this great work:

TABLE FOR INVESTORS.

THE following table shows the rate per cent of annual income to be realized from stocks or bonds bearing any given rate of yearly dividends or interest, from 1 to 15 per cent, when purchased at various prices from 10 to 800 per cent. This table applies equally well to both stocks and bonds, and has nothing to do with the length of time which a bond has to run to maturity.

For example: To ascertain what rate of annual interest will be realized on a bond or stock which bears 7 per cent per annum and can be purchased at 92 (i.e., at 92 per cent of its par value, whatever the par may be), find 92 in the column of "purchase price" and follow that line across to the column headed "7 per cent," which will show the correct figures—in the present instance, 7½ per cent.

Purchase Price.	3 per cent.	3.65 per cent.	4 per cent.	4½ per cent.	5 per cent.	6 per cent.	7 per cent.	7½ per cent.	8 per cent.	9 per cent.	10 per cent.	12 per cent.	15 per cent.

SUCCESSION TO THE CHIEF MAGISTRACY

RECENT events in the United States have forcibly drawn public attention to the constitutional and legal provisions for the Presidential succession. In view of the great amount of strife, anarchy and civil war with which the pages of history are filled, growing out of disputed successions and contending dynasties, a wise foresight and regard for public order demand that ample safeguards should be provided to assure a Presidential succession concerning which there could be no dispute. The power vested by the Constitution in Congress to provide for the case of the removal, death, resignation and inability, both of the President and Vice-President has been exercised only in the statute of 1792, (Revised Statutes, Sec. 146,) which provides that the President of the Senate, or, if there is none, the Speaker of the House of Representatives, shall act as President. The Forty-Sixth Congress adjourned March 4, 1881, at the expiration of its term of office, leaving no President of the Senate and no Speaker of the House of Representatives in existence. The assassination of the President and his long continued disability created the most anxious solicitude in the public mind, regarding the discharge of the duties of the Presidential office.

Pending some additional legislation regarding the succession to the presidency, and defining the conditions under which the continued disability of the President may entitle the Vice-President to assume the functions of Chief Magistrate, the provisions of the several State constitutions as to succession to the chief magistracy of the State, possess interest. The following is a summary of these various provisions.

It will be noted that 11 States have no Lieutenant-Governor; but that provision is made in all, for a constitutional successor who shall discharge the office of Governor in case of any disability of the Governor-elect.

Alabama. No Lieut.-Governor. In case of the impeachment of the Governor, his removal from office, death, refusal to qualify, resignation, absence from the State or other disability, the power of the office of governor until the time appointed for the election of governor arrives, or until the disability is removed, is to be exercised by the President of the Senate; or in case of his removal or disability, the Speaker of the House of Representatives, shall administer the government.

Arkansas. No Lieut.-Governor. The office devolves upon the President of the Senate or Speaker of the House of Representatives successively.

California. The succession to the office of Governor falls (1) to the Lieut.-Governor; (2) to the President *pro tempore* of the Senate, and in case of his removal or disability (3) to the Speaker of the House.

Colorado. Vacancy or disability in the office of Governor devolves his duties upon (1) the Lieut.-Governor; (2) the President of the Senate *pro tempore*; (3) the Speaker of the House.

Connecticut. The constitution provides for no disability of the Governor except through death, resignation, refusal to serve, removal from office, impeachment or absence from the State. In either of these contingencies the Lieutenant-Governor succeeds, or in case of his disability from any of the above causes, the President of the Senate *pro tempore*. If the Lieut.-Governor while administering the government, dies or resigns, the Secretary must convene the Senate for the purpose of choosing a President *pro tempore*.

Delaware. No Lieut.-Governor. In case of any vacancy in the office of Governor, by death, removal, resignation, or inability, the office is to be exercised (1) by the Speaker of the Senate; (2) by the Speaker of the House; (3) by the Secretary of State, until the next meeting of the General Assembly, who must elect a person to exercise the office until a governor elected by the people is duly qualified.

Florida. Vacancy or inability in the office of Governor devolves its duties (1) on the Lieut.-Governor; (2) on the President *pro tempore* of the Senate for the residue of the term or until the disability shall cease.

Georgia. No Lieut.-Governor. Vacancy or disability in the office of Governor devolves the executive power (1) on the President of the Senate; (2) on the Speaker of the House.

Illinois. Vacancy or disability in the office of Governor devolves its powers on (1) the Lieut.-Governor (2) the President of the Senate; (3) the Speaker of the House.

Indiana. Vacancy or inability in the office of Governor devolves it on the Lieut.-Governor. The constitution empowers the General Assembly to provide by law what officer shall act as Governor in case both of these offices become vacant, through inability or otherwise.

Iowa. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor; (2) the President *pro tempore* of the Senate; (3) the Speaker of the House of Representatives.

Kansas. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor; (2) the President *pro tempore* of the Senate; (3) the Speaker of the House of Representatives.

Kentucky. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor; (2) upon the President *pro tempore* of the Senate.

Louisiana. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor; (2) the President *pro tempore* of the Senate.

Succession to the Chief Magistracy.—Continued.

Maine. No Lieut.-Governor. Vacancy or disqualification in the office of Governor, devolves it upon (1) the President of the Senate; (2) the Speaker of the House. If the three offices in succession become vacant, the Secretary of State must convene the Senate, that a President may be chosen to exercise the office of Governor.

Maryland. No Lieut.-Governor. In case of vacancy or disqualification in the office of Governor, the General Assembly must elect a Governor; or if not in session, the President of the Senate or (2) the Speaker of the House is to exercise the office of Governor.

Massachusetts. Vacancy by reason of death, absence or otherwise devolves the office of Governor upon the Lieut.-Governor. Whenever the office of Governor and Lieut.-Governor shall be vacant by death or otherwise, the office devolves upon the Council (a body of nine officers appointed by the Governor.)

Michigan. Vacancy or inability in the office of Governor devolves it upon (1) the Lieut.-Governor (2) the President *pro tempore* of the Senate.

Minnesota. Vacancy from any cause whatever in the office of Governor devolves it upon the Lieut.-Governor in case of vacancy. The Senate must elect a President *pro tempore* to be Lieut.-Governor.

Mississippi. Vacancy by death or otherwise in the office of Governor, or his inability from protracted illness, devolves his duties upon (1) the Lieut.-Governor; (2) the President of the Senate *pro tempore*; (3) the Speaker of the House. In case of the inability of the foregoing officers, the Secretary of State must convene the Senate to elect a President *pro tempore*.

Missouri. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor (2) the President of the Senate; (3) the Speaker of the House.

Nebraska. Same as the preceding.

Nevada. Vacancy or inability in the office of Governor devolves it (1) on the Lieut.-Governor; (2) on the President *pro tempore* of the Senate.

New Hampshire. No Lieut.-Governor. Vacancy by death or otherwise devolves the governorship upon the President of the Senate.

New Jersey. No Lieut.-Governor. Vacancy or inability in the office of Governor, devolves it upon the (1) President of the Senate; (2) the Speaker of the House.

New York. Vacancy or inability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the President of the Senate.

North Carolina. Vacancy or inability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the President of the Senate *pro tempore*. If the latter becomes Governor, the Secretary of State must convene the Senate to elect a President.

Ohio. Vacancy or disability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the President of the Senate; (3) the Speaker of the House.

Oregon. No Lieut.-Governor. Vacancy or inability in the office of Governor, devolves it on (1) the Secretary of State; (2) the President of the Senate.

Pennsylvania. Vacancy or disability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the President *pro tempore* of the Senate.

Rhode Island. Vacancy or inability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the person entitled to preside over the Senate for the time being.

South Carolina. Vacancy or inability in the office of Governor, devolves it on the Lieut.-Governor. The Legislature must provide what officer shall act as Governor, in case of a double vacancy or inability.

Tennessee. No Lieut.-Governor. Vacancy in the office of Governor, devolves the office on (1) the Speaker of the Senate; (2) the Speaker of the House. No provision for the case of disability.

Texas. Vacancy or disability in the office of Governor, devolves it on (1) the Lieut.-Governor; (2) the President of the Senate, for the time being.

Vermont. Vacancy or disability in the office of Governor, devolves its powers upon the Lieut.-Governor. The Legislature must provide for further vacancy or disability.

Virginia. Vacancy or inability in the office of Governor, devolves it upon the Lieut.-Governor, the General Assembly must provide by law for the discharge of the executive functions, in other necessary cases.

West Virginia. No Lieut.-Governor. Vacancy or disability in the office of Governor, devolves it upon (1) the President of the Senate; (2) the Speaker of the House. In all other cases where there is no one to act as Governor, one shall be chosen by joint vote of the Legislature. Whenever a vacancy occurs in the office of Governor, before the first three years of the term [of four years] have expired, a new election for Governor must take place to fill the vacancy.

Wisconsin. Vacancy or inability from mental or physical disease devolves the office upon (1) the Lieut.-Governor; (2) the Secretary of State.

NOTE.—Regarding this and all other estimates of the aggregate amount of the precious metals existing in the world at any period, it is only candid to state that they cannot rise above the domain of conjecture. Statistical science, even now in its infancy, was not born before the present century; and where no census even of the numbers of mankind existed, nothing could possibly be known regarding the amount of the precious metals.—EDITOR OF AMERICAN ALMANAC.

as revised under Act of March 3d, 1879.

First Class Mail Matter.

LETTERS.—This class includes letters, postal cards, and any thing sealed or otherwise closed against inspection, or any thing containing writing not allowed as an accompaniment to printed matter, under class three.

Postage, 3 cents each half ounce or fraction thereof.

On local or drop letters, at free delivery offices, 2 cents. At offices where no free delivery by carrier, 1 cent.

Prepayment by stamps invariably required.

Postal cards, 1 cent.

Registered letters, 10 cents in addition to the proper postage.

The Post-Office Department or its revenue is not by law liable for the loss of any registered mail matter.

Second Class.

REGULAR PUBLICATIONS.—This class includes all newspapers, periodicals, or matter exclusively in print and regularly issued at stated intervals as frequently as four times a year, from a known office of publication or news agency. Postage, 2 cents a pound or fraction thereof, prepaid by special stamps. Publications designed primarily for advertising or free circulation, or not having a legitimate list of subscribers, are excluded from the pound rate, and pay third class rates.

Third Class.

Mail matter of the third class includes books, transient newspapers and periodicals, circulars, and other matter wholly in print, legal and commercial papers filled out in writing, proof-sheets, corrected proof-sheets, and manuscript copy accompanying the same.

MS. unaccompanied by proof-sheets, letter rates.

Limit of weight, 4 pounds each package, except single books—weight not limited.

Postage, 1 cent for each 2 ounces or fractional part thereof, invariably prepaid by stamps.

Fourth Class.

Embraces merchandise and all matter not included in the 1st, 2d, or 3d class, which is not liable to injure the mail matter. Limit of weight, 4 pounds.

Postage, 1 cent each ounce or fraction thereof, prepaid.

All packages of matter of the 3d or 4th class must be so wrapped or enveloped that their contents may be examined by postmasters without destroying the wrappers.

Matter of the second, third, or fourth class containing any writing, except as here specified, or except bills and receipts for periodicals, or printed commercial papers filled out in writing, as deeds, bills, etc., will be charged with letter postage; but the sender of any book may write names or addresses therein, or on the outside, with the word "from" preceding the same, or may write briefly on any package the number and names of the articles inclosed.

Postal Money Orders.

An order may be issued for any amount, from one cent to fifty dollars, inclusive, but fractional parts of a cent cannot be included.

The Fees for orders are : On orders not exceeding \$15.....10 cents.
 " " over \$15 and not exceeding \$30.....15 " "
 " " over 30 " " 40..30 "
 " " over 40 " " 50..25 "

When a larger sum than fifty dollars is required, additional orders must be obtained; but no more than *three* orders will be issued in one day from the same post-office to the same remitter in favor of the same payee.

Free Delivery.

The free delivery of mail matter at the residences of the people desiring it is required by law in every city of 50,000 or more population, and may be established at every place containing not less than 20,000 inhabitants. The present number of free delivery offices is ninety.

The franking privilege was abolished July 1, 1873, but the following mail-matter may be sent free by legislative saving-clauses, viz.:

1. All public documents printed by order of Congress, the Congressional Record and speeches contained therein, franked by members of Congress or the Secretary of the Senate, or Clerk of the House.
 2. Seeds transmitted by the Commissioner of Agriculture, or by any member of Congress, procured from that department.
 3. All periodicals sent to subscribers within the county where printed.
 4. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, publications required to be mailed to the Librarian of Congress by the copyright law, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.
- All communications to Government officers, and to or from members of Congress, are required to be prepaid by stamps.

THE ATLANTIC MONTHLY.

THE first number of THE ATLANTIC MONTHLY appeared in November, 1857. Since that time there has not been a single issue which has not more or less successfully realized the wish of Mr. Phillips, its first publisher, "that the magazine should represent what is best in American thought and letters." It has not aimed to secure popularity by sensational articles, or by superficial treatment of subjects in which the people are interested. On the other hand, it has not sought merely to reach the persons of highest cultivation, but rather, by representing what is best in American thought and letters in the departments of Fiction, of Essays, of Poetry, of Travel, and Discussion of Current Topics, it has endeavored to command the attention and reward the careful reading of all intelligent American citizens.

FICTION.

The Serial and Short Stories of THE ATLANTIC have been of a very high order. The catalogue of those who have contributed to this department embraces numerous writers of distinction, and a list of the stories they have written for the magazine includes many of the best Novels and Short Stories in modern literature.

ESSAYS AND SKETCHES.

In this delightful field of letters THE ATLANTIC has been peculiarly fruitful. Many volumes of rare interest have been made up from this part of THE ATLANTIC'S contents.

POETRY AND CRITICISM

Have received from THE ATLANTIC a kind and amount of attention which have given it especial preëminence as a literary magazine.

TIMELY TOPICS.

THE ATLANTIC profoundly believes in the discussion of subjects in which the public is or should be interested. It enlists the aid of writers who, by ability, education, experience, and impartiality, can speak with authority on topics which belong to the immediate hour, but which involve principles and consequences that give them permanent importance.

OPINIONS OF THE PRESS.

"The series promises to be the best military history of the war yet attempted."—*Army and Navy Journal*.

"These books are written in a spirit of the utmost fairness, and the writers confine themselves to facts, which are detailed in such a terse, rapid, graphic manner as to leave a deep impression."—*Rochester Morning Herald*.

"The authors secured, with two exceptions, are all participants in the various campaigns which they describe, and the weight of their names alone—Humphreys, J. D. Cox, Webb, Doubleday, Palfrey, and others—is sufficient to attract immediate attention to whatever they write."—*Army and Navy Register*.

"The first two volumes of the 'Campaigns of the Civil War,' 'The Outbreak of the Rebellion,' by John G. Nicolay, and 'From Fort Henry to Corinth,' by Manning F. Force, go far to justify the hope of the publishers that the work would prove the most important of recent contributions to American history."—*Boston Advertiser*.

"The great merit of these two little books (*The Peninsula* and *The Army Under Pope*) is the spirit in which they approach the subject—a spirit which already looks at the question through the perspective of history, and which until lately has seemed to be impossible to all writers on the subject."—*The Critic*.

THE AMERICAN ALMANAC

— AND —

TREASURY OF FACTS,

STATISTICAL, FINANCIAL AND POLITICAL,

Now in its fifth year of publication, is annually corrected up to the very latest date before going to press, and embodies more valuable practical information than any single volume published.

It is a compact pocket encyclopædia of facts, carefully compiled and thoroughly indexed.

OPINIONS OF THE PRESS.

New York Evening Post. "Every one who has learned by frequent use of the work to know its unique value as an inexhaustible treasury of exact statistical and other information will be glad to know that the 4th volume, for 1881 has made its appearance."

Boston Journal. "By far the most complete hand-book of facts and figures concerning this country which is anywhere published."

Philadelphia North American. "The variety and extent of the information contained fills the mind of the reader with continual admiration. It is a perfect cyclopædia of Statistics, as lucidly and compactly arranged, as it is comprehensively collected. The American Almanac can only be described by saying that it contains everything that any one by any likelihood will want to know."

New York Graphic. "The most complete and valuable statistical hand-book published in the United States."

London Railway Gazette. "The volume is one which few commercial men could afford to be without, as the facts which it will give them will enable them to economise the cost of it many times over in a brief period."

Springfield Republican. "It supplies a want felt in business offices, with excellent intelligence and thoroughness, making a year-book far more valuable than any heretofore published in the United States."

Hartford Courant. "So far, it has proved to contain the answer to every question of fact that has come up for consideration since its receipt."

Louisville Courier-Journal. "As a book of reference, we know of no other single work which can substitute it."

Illinois Staats Zeitung. "A veritable mine of statistics."

Elmira Advertiser. "It would be easier to tell what is not in it, than what is. Go and buy it."

Washington Post. "We consider it really only less valuable than the Bible, Shakspeare and Webster's Dictionary."

Boston Advertiser. "Presenting vastly more information than is to be found in any other publication."

New Bedford Mercury. "It will become indispensable in every library."

New York Tribune. "The most comprehensive, if not the most compact manual of political, statistical, and miscellaneous information issued in this country."

Boston Transcript. "Of unusual value for reference, covering almost every point concerning matters of national interest; that one needs to know."

New York World. "It nearly approaches the ideal pocket encyclopædia of which the average man always stands so sorely in need."

Pittsburg Post. "It combines more information on all subjects referring to American progress, politics and statistics than any book ever printed in this country."

Philadelphia Times. "The most comprehensive and complete work of the kind ever issued. Must prove indispensable to every man in public life, and will be of the greatest use to all business men."
